

Up-the-Pole Baskets

Fabulous, easy to mount units that can be safely secured to almost any pole, post or bollard using brackets.

Top Tips

For safe installation and planting of your Up-the-Pole Baskets

1. Place your new Up-the-Pole Basket or liner on a suitable, stable surface.
2. Fill the basket or liner with moist compost, and slow release fertiliser if desired, and plant up as required. Plant up densely for best results. **DO NOT** fill the water reservoir at this point.
3. Following our manufacturer's instructions, securely fix the basket to the pole or post using the appropriate supporting bracket(s). Where applicable, place the planted up liner in the basket.
4. The integral water reservoir can now be filled with water and nutrient. Leave the unique **Aquafeed™** capillary action matting to do the rest!
5. Make one final check to ensure that the bracket(s) and basket are properly secure.
6. Top up with water and nutrient no more than twice a week.

Up-the-Pole Basket

Product Code	Diameter mm	Depth mm	Compost (litres)	Water (litres)	Total Weight* (kg)
CUH-1P	470	270	12	5	17
CUH-2P	590	270	27	11	38
CUH-3P	800	270	52	26	78

Half Unit Up-the-Pole Basket

Product Code	Diameter mm	Depth mm	Compost (litres)	Water (litres)	Total Weight* (kg)
UTP-1P	590	270	12	5	17
