**Numerous colours**  
12 preferred colours and 6 decor surfaces offer a wide variety of design options.

\*With up to 30% better thermal insulation in comparison with a common multi-purpose door / security door

# For new construction and modernisation

## High-quality doors made of steel

Hörmann has the right door for all areas in your home: for making the entrance to the basement secure, for workshops or hobby rooms, a child's or teenager's bedroom, a converted loft or as a door connecting the garage with the rest of the house.

### Multi-purpose doors

A multi-purpose door must withstand a lot over many years. The MZ multi-purpose door is stable, highly durable and weather-resistant and has been tried and tested for over forty years. It is ideal for both inside and outside. An MZ Thermo door with thermal breaks is also available and provides up to 30 % better thermal insulation compared to a common multi-purpose door.

### Security doors

Hörmann has the right security door for every demand. They come with everything from standard security equipment, to door leaves with thermal breaks to provide the best thermal insulation when used as an external door for basements, outbuildings and garages.

### Fire-rated doors

When it comes to fire protection, Hörmann has unparalleled expertise to share with you: for doors in boiler rooms and oil tank storage rooms, but also as a passage from the garage to the house. Your advantage: The WAT fire-rated security door can be optimally matched to the internal doors in your home.

### Internal doors

Inexpensive and sturdy ZK internal doors are set apart by many advantageous features and can be used from the basement up to the loft. They are durable, resistant to stains, light and close quietly. They also come in almost any colour and are ideal for modernising your home.

Perfect for outbuildings, utility sheds or storage rooms: the MZ multi-purpose door

The KSI Thermo offers the best thermal insulation and WK 2 security equipment as standard

Europe's most popular boiler room door: the H8-5 fire-rated door
