

Hörmann Quality Doors

For entrances, flats, basements and loft conversions

Hörmann aluminium entrance doors, the best thermal insulation in a top design. With matching side elements and canopies.

ThermoPro steel entrance doors are a beautiful way of presenting your home.

Hörmann entrance doors are also attractive on the inside thanks to well thought-out equipment and excellent quality.

Hörmann has the right door for any area.

Combine, adjust, modernise

The right model for every need and demand

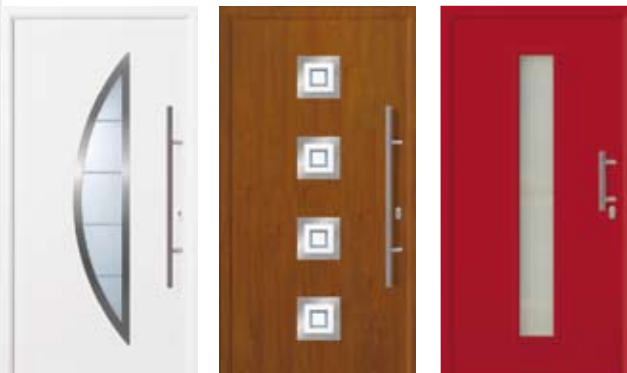

Hörmann aluminium entrance doors are available in the following series: Comfort, TopComfort, TopPrestige and TopPrestigePlus. The doors have the best possible thermal insulation thanks to an aluminium profile system with thermal break, come with extensive security equipment, are acoustic-rated and are sturdy for many years to come. The range of doors is extended by our ThermoPro entrance doors. A beautiful appearance without a visible leaf frame and excellent thermal insulation make these steel entrance doors an inexpensive alternative with the same high Hörmann quality.

Style examples from the aluminium entrance door range: 559 TC/TP in White, 595 TP in CH 703 and colour embellishments in Ruby red, 589 TP in White aluminium and colour embellishments in Moss green

An individual selection of colour and surface finishes

As standard, Hörmann entrance doors come in Traffic white (RAL 9016), many preferred colours and in all RAL colours. Our aluminium entrance doors and some styles in our steel entrance door range are also available with Decograin surfaces. You may also choose between two high-quality textured paints for our aluminium entrance doors: CH 703 and CH 607.

ThermoPro style examples: TPS 900 White, TPS 800 with Golden Oak decor surface, TPS 020 in Red

Extra security – Secure by Design & WK2

Hörmann's ThermoPro entrance doors are now available (nine styles) in a Secured by Design option. While the aluminium entrance doors, side elements and transom lights come with break-in-resistant WK2 equipment.

Best thermal insulation for a better quality of life

Good, better, best: Hörmann can provide you with every level of thermal insulation, depending on the series and equipment variants.

As standard, Hörmann aluminium and ThermoPro entrance doors come in inexpensive Traffic white (RAL 9016), in 11 preferred colours, with Decograin decor surfaces, and in all the colours in the RAL colour chart.
