

SLATE RIVEN

We've been fans of Slate from its arrival in our range some two decades ago. It remains as popular today as it was back then - practical, affordable and versatile.

'Riving' is splitting or cleaving a stone that is naturally made up of layers. Some Riven surfaces undulate more than others and this generally dictates whether the Slate looks contemporary or more rustic. Riven Slate works particularly well when used seamlessly from interior to exterior, so take a look at our Outdoor Stone collection.

Below: OYSTER RIVEN

SLATE HONED

A small but spectacular collection of smooth Slates that are slightly metallic in appearance.

Sufficiently decorative to bring life to both walls and floors, Honed Slate offers a distinctive satin finish which enhances the detail of the stone. Often used on feature walls or as a decorative floor covering, the varying tones and striking minerals present combine to dramatic effect.

SCHIST RIVEN

Oyster Schist has been a steadfast part of the Mandarin Stone collection from our establishment over twenty years ago.

Never failing to impress with its wide spectrum of colours and beautifully textured surface, this Schist combines durability and inherent good looks with affordability. Shown here as a practical, non-slip option for a pool surround, Oyster provides a lighter and more cost-effective alternative to our Flamed Brushed Basalt.
