Granite Masonry, St Barts, London

The RIBA Award winning £28million redevelopment of Exhibition Road has transformed one of London's most visited streets into one of the most accessible cultural destinations in the world.

It is one of London's most high profile streets, being home to leading cultural and academic institutions such as the Natural History Museum and Imperial College, but over time had become inefficient, being dominated by traffic with narrow, crowded pavements and street clutter, and was unable to handle the millions of people who visit every year. A complete redesign was needed to improve infrastructure and access to facilities.

Architects Dixon Jones' vision was a complete overhaul of the street, creating a 'shared space', which means that pedestrians and vehicles co-exist without one being the dominant force. This is created by the removal of kerbs, pavements and other obstructions, this encourages motorists to slow down and engage with the pedestrians creating a safer and more secure environment for all.

Marshall's supplied a range of key physical features of the redevelopment; natural stone, bespoke street lighting, drainage solutions and street furniture.

22,000m² of Yorkstone paving and Granite setts banded in black and pink, which create the diagrid crisscross paving pattern giving the street its unique visual identity.

The street's drainage solutions are provided by two continuous linear drainage channels, and include bespoke cast iron tops.

Woodhouse, part of the Marshall's PLC group, provided a new multi-function street lighting concept; 28 bespoke lighting masts which define the centre of the carriageway. Woodhouse also supplied coordinated Geo benches and litter bins.

The finished result makes Exhibition Road one of the most striking thoroughfares in London. The paving's diamond shape pattern naturally leads users across the street from one famous cultural centre to another.

The clutter free environment feels calm, and allows crowds to flow more freely over the paving allowing for easy passage from South Kensington tube station to the museums which line the famous road.

Mayor of London, Boris Johnson, said: 'This clever approach to rearranging the streetscape at the heart of one of the most important cultural and academic corners on the planet will heighten the whole experience for visitors.'

'In particular it will make it much easier and even more pleasurable for families visiting these unique attractions with space to wander unhindered in an area that puts people first.'

Councillor Sir Merrick Cockell, leader of the Royal Borough of Kensington and Chelsea, said: 'We now have a unique streetscape that will delight our many millions of visitors and which sets a new standard for urban design.'
