Marshalls was founded in 1886 when Solomon Marshall first quarried and produced Cromwell Yorkstone paving. The experience gained from over 100 years of supplying stone has enabled Marshalls to evolve and adapt to meet changing customer and industry needs, becoming the most innovative and exciting stone supplier in the country.

As well as the largest range of UK produced stone landscape products, Marshalls has decades of experience of importing stunning natural stone from around the world. Our experience aligns quality with durability and service to provide solutions for all schemes regardless of size or complexity

Aesthetics are a major driver with Landscapes and our large portfolio of products covering many different stone types and colours provides interesting solutions for all landscape elements. Our ability and experience in blending colours then extends the aesthetic options available to create unique spaces with granites and sandstones.

Unique and interesting designs using patterns and shapes can be achieved by using Marshalls expertise and involving our stone specialists and design team. Marshalls can provide expertise all the way through the design and construction process from general designs to modelling to component design.

Natural Stone

All materials are sourced to the highest possible standards and as the only construction sector signatory to the UN global compact these standards are enshrined in our culture. Marshalls offer an independently audited Fairstone range which is endorsed by Unicef, which is why we supply stone across the globe from America to Australia. Our own factories and quarries are accredited to ISO9001, ISO14001 and OHSAS18001 and we are the only stone producer in the world to achieve PAS99 accreditation for quality, environment and safety.

Going beyond our core range and sourcing other stones which are not shown here is not a problem. Just contact our specialists and we can discuss your requirements and suggest further suitable materials which will match your expectations.

The transformation of Trafalgar Square forms part of the 'World Squares for All' project, undertaken by Transport for London (TfL) with a mission 'to transform London's key heritage sites into truly 'world class' spaces to be enjoyed by Londoners and visitors alike'. The key objectives of the project were the pedestrianisation of the north side of the Square, to provide direct access to the National Gallery, the creation of a new central staircase from the North Terrace to the Square and renewed paving to provide aesthetic appeal to the whole area.

Marshalls involvement with Trafalgar Square began at the earliest stages with initial pre-tender discussions with project managers Schal, architects Foster and Partners and TfL. Marshalls was also consulted about preferred contractors and recommended Fitzpatrick based on highly successful previous project partnerships.

From the commencement of work on site, the partnering approach of Marshalls and Fitzpatrick proved the key to project success. Potential logistical problems, due to the busy location and lack of site storage facilities, were addressed quickly before they impacted on the project. Following discussions with Fitzpatrick, Marshalls developed a new traceable labelling format that enabled the right types and correct quantities of stone to be delivered to site on a 'just in time' basis.

The nature of the project also demanded a substantial quantity of bespoke radial paving units, which Marshalls designed and produced with specialist CAD equipment. In total, Marshalls supplied some 24,000 m² of high quality Diamond Sawed Yorkstone Paving as well as an additional 7,000 m of Granite Kerb.

The redeveloped Trafalgar Square now takes its place as one of the capital's most recognisable attractions. "As soon as a potential problem was identified, Marshalls' reaction was immediate and indicative of the whole company's approach – put simply, they found a solution rather than coming back with another problem – the result was a hugely successful project." Graham Davey, Purchasing Director, Fitzpatrick

Scoutmoor, Trafalgar Square

Scoutmoor Yorkstone is a mainly Blue Grey stone with occasional Brown mainly elliptical shaped shading. With over 100 years' history of supply this peerless Yorkstone has proven itself in the highest loading and intensive wearing environments. The choice for iconic places such as Trafalgar Square and Regent Street it is Marshalls' most popular Yorkstone and has been used widely throughout the UK. Scoutmoor is also a very versatile Yorkstone allowing designers to add in creative features and details to enhance the landscape.

Moselden, Capital Finish

Moselden, Diamond Sawn

Moselden is a mainly buff Yorkstone with some grey tones and banding in different shades which give this stone quite a warm feel. With enough variation to be instantly recognisable as natural stone but not dominate a space, it has a proven performance from Horseguards, Whitehall and One New Change Shopping Centre. A very versatile stone which allows designers to create unique landscapes by creating varied shapes and elements.

Cromwell

Yorkstone Paving

A mainly plain light buff stone with very occasional dark banding Cromwell is a very exclusive and desirable Yorkstone which is highly sought after for the most prestigious projects. First used in the 1800's it has a proven history of performance from Kensington High Street to the London Olympic Park. Very high performance characteristics coupled with a slip resistance in the excellent category make this an ideal choice for any setting.

Greenmoor Rustic

Yorkstone Paving

Greenmoor Rustic

Greenmoor Rustic, Doncaster

Greenmoor Rustic is a textured Yorkstone with a wide variation of colour from Blue Grey to Brown and Ochre tones. Generally a more suitable paving choice than traditional hand split Yorkstone for areas where wheelchairs and prams may circulate, its textured surface is a very good enhancement for slip and skid resistance. Greenmoor Rustic was first introduced around 25 years ago and early schemes such as Seven Dials still look and perform well which is why it has been used on major projects such as Liverpool Ropewalks and Whitehaven Harbour. As much at home in a modern landscape as a more traditional heritage type setting.

Westmoor Crest

Yorkstone Paving

Westmoor Crest is a textured Yorkstone paving which subtly varies from light Blue Grey to Brown. It gives exceptional performance where a high slip or skid resistance may be required and is exceptionally strong giving high load carrying performance. This new texture has been used at St Peters Square in Manchester for both paving and roadways to give a harmonised landscape feel.
