Piora

Permeable Paving System

The best-selling permeable paving system in the UK marries superb SuDS performance with a hard wearing, heavy load bearing, attractive block paved surface. Already used in a vast range of applications from industrial to residential, Piora offers a classic aesthetic for all requirements whilst simultaneously helping to alleviate the triple threat of flood, drought and pollution. The unique, patented nib on the edge of each block has been proven in extensive testing over more than 14 years.

In addition, during field tests undertaken in 2014, we have proven that the patented Marshalls Piora nib provides the surface with 40% more interlock than our standard block. This means that specifying Marshalls Piora blocks will bring long-term benefits in relation to pavement longevity and maintenance requirements - regardless of the intrinsic hydraulic benefits.

This product is available in special machine lay formation packs. This makes automated installation easy, saving time and improving health and safety on large jobs.

NO_x On request, this product can be manufactured using Noxer technology to improve the air quality in the area in which it is installed. For more information please see page 7.
