

Interlocking Traffic Block, Milton Keynes

Interlocking Traffic Blocks

Temporary Concrete Traffic Blocks

Interlocking traffic blocks are used for the construction of temporary traffic islands and junctions allowing trials to be undertaken without the costs of excavation. Flexible and versatile to allow any size or shape of traffic island to be constructed, these circular concrete blocks are simply connected by means of a galvanised bar attached to a central bolt.

These products are compliant with the Highway (Road Humps) Regulations 1990 and Road Humps (Scotland) Regulation 1991, as well as with the Highways (Traffic Calming) Regulations 2000. They also comply with Local Transport Note LTN 01/07 and 01/08 policies.

	Length (mm)	Width (mm)	Height (mm)	Weight (kg)	Grey Item Code	White Item Code	Black Paint Item Code	Yellow Paint Item Code	Item Code
Interlocking Traffic Block	225	300	150	21.5	FM7500100	FM7500200	FM7500300	FM7500400	
Locking Bar for Traffic Block									FM7505000
Traffic Block Stanchions			930	8					FM7505100
