\*Natural products are manufactured from aggregates sourced locally to the works and contain no pigmentation, therefore colour variation between products from different works is possible.

Available in a range of colours and sizes, the cost effective Myriad Combined Concrete paving collection provides scope for optimum creativity within any urban landscape project. Popular with designers and architects, it allows for mixing and matching the plan sizes and gauges to create eye-catching, original designs. Designers can tailor the Myriad collection to meet any project's needs - whether that means sticking to one size and colour pattern, or crafting a vibrant patchwork of paving. Myriad is now available in 5 colours, including the new Sunlight colourway and 6 plan sizes, including the new 400x400 plan size, making the range suitable for multi-functional spaces.

## FURTHER INFORMATION

Cleaning & Maintenance	Cleaning & maintenance details are available on request
Efflorescence	Any product containing cement during its early life may exhibit a temporary white discolouration known as efflorescence. This is not a product fault and will gradually disappear with exposure to natural weathering and trafficking
Weathering	It should be appreciated that with all products weathering and site conditions can cause shade variation to appear across the surface of individual units. This does not in any way affect the performance of the units and any such variation will diminish over a period of time as the product matures.
Product Evolution	Marshalls reserve the right to amend the technical information as deemed necessary and in accordance with the relevant national and international standards without notice. The evolution of new product design is continuous and information is subject to change without notice. Customers should check with the supplier to ensure that they have the latest details

## APPLICATION

<b>Suitability</b>	For any given application, any resulting soiling (whether vehicular or pedestrian origin) will be more apparent on the lighter shades than any of the darker shades, so careful consideration should be given when selecting colour in relation to application. Therefore, consideration should be given to any possible additional maintenance requirements, to ensure a desirable and acceptable appearance is provided.
<b>Loading Classification</b>	Category 6 - 10 large goods vehicles per week (0.15 msa)
