Functional, Durable, Excellent Impact Resistance, Eye catching.

ASF offer an extensive range of Steel Bollards which are designed to compliment the style and simplicity of many modern schemes as well as providing superb Traffic Control and Pedestrian Protection. They can be adapted to form chain or rail barriers, cycle stands, gate posts and to carry traffic signs.

ram-raid

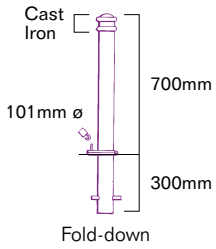

Features large diameter body, 8mm thick steel, increased root depth, and removable cap to allow for concrete infill to provide increased impact resistance.

security bollards

Practical, Simple, Excellent Access Control, Long Lasting, Strong.

ASF offer two designs – ASF 650 and ASF 651 – which solve the problem of access control and yet leave the area unobstructed when required as they both close down below the ground.

They are also suitable for Car Park Protection and defending Door and Shop Fronts.

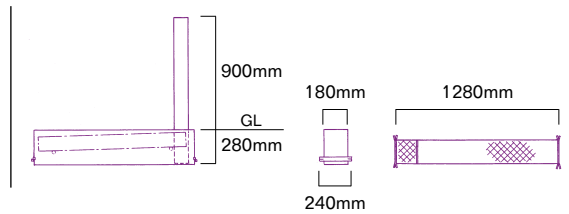

The ASF 650 has the advantage of a shallow installation depth and can also be chain linked.
