

# FOOD MANUFACTURING PLANT AND DISTRIBUTION CENTRE

## - Line Marking

Line marking paint products for the world's largest dairy company

### FOOD MANUFACTURER AND DISTRIBUTOR

#### SITUATION:

Line marking for the world's largest dairy company. The Buckinghamshire, UK site includes a manufacturing plant, distribution centre and car parks.

The newly built factory found that the brand new walkways, lorry bays and numbering, painted just a few months prior and weren't performing.

#### THE REQUIREMENTS:

The Meon team spent a great deal of time on location assessing what was best for the Dairy site, which products would provide the best results and supplied a fully spray-able MMA system which was fast to lay. This system did not require any hot works; large machinery meaning costs could be kept down. This also meant that the system could be laid in a short amount of time minimizing impact to business.

#### THE SOLUTION:

Having spent time with the site staff and providing expert advice, Meon was able to ensure that functional, bright and long lasting demarcations were apparent in the new improved markings. Whilst also showing the extensive benefits of the product.

Meon provided the necessary training and support, the areas to be marked were primed with UltraPrime before the lines were completed with Spectrum products in both yellow and white.

#### PROJECT GOALS:

- Longevity of line marking
- Bright coloured and crisp lines
- Fast curing products

#### SYSTEMS USED:

- Graco LineLazer
- UltraPrime
- Spectrum sprayable MMA line marking paint
