Semi-Mature Trees
Screening Trees
Specimen Topiary
Instant Hedge
The Company

Practicality Brown are a well respected and long established supplier of Semi-mature Trees, Instant Hedges, Specimen Topiary and Screening Products.

Our business has constantly evolved over the last 30 years, diversifying to meet market trends and remaining competitive in our activities, whilst ensuring that our customer service is exceptional.

We offer supply and delivery terms, or a full installation service, with which guarantees are available.
Semi-mature Trees

We specialise in the 'Instant Landscape', offering semi-mature trees from 20 cm to 1 metre girth and 15 metres high. With stock at our head office in Iver, Bucks, and our relationship with European Nurseries, we can supply a vast range of species, forms and sizes. Not only can we supply the semi-mature trees, we also offer a full planting and after care service.
Instant Hedges

We are the sole supplier of the unique and exceptional ‘Elveden™ Instant Hedge’. With the foresight to think ahead by approximately 10 years, we are leading our competitors, recognising the market trend for the complete ‘Instant Landscape’.

The Elveden™ Instant Hedge is planted in a single row. Nurtured for up to 8 years, and offered as a solid, dense product, virtually impenetrable and providing an immediate screen and complimenting large tree planting projects.

Many species are now available in our Instant Hedge, and typically the hedges are 1.8 metres tall, with taller hedge available in some species.

Using Elveden Instant Hedge™, our experienced installation teams can plant 50 linear metres each day, and with the right preparation, there is no possibility of transplant shock which is a risk normally associated with individual plants.
**Bespoke Projects**

In addition to supplying our products to Garden Designers, Landscape Architects and Developers, we are also able to offer a high quality installation service for our Private Clients.

From a few semi-mature trees to an entire hard and soft landscape package, we have experienced staff able to carry out every aspect of the design and build.

We offer dedicated irrigation systems appropriate to each plant’s needs, lighting systems if required and the entire package is then our responsibility from start to finish - and afterwards through our maintenance and guarantee options.

Tree Moving

When considering a new development, extension, driveway or new road, before ordering a chainsaw team, consider the value of the trees!

Depending upon species, size and condition, each tree may be worth thousands of pounds.

We operate a fleet of 1.1 metre and 1.6m tree spade machines. The smaller machines will transplant trees up to 30cm girth, the larger machines capable of transplants up to 60cm. For larger trees, we have one additional machine or we can prepare trees and crane, depending on location and access.
