

# Instant Hedge from Practicality Brown

Before Instant Hedge is planted

The day Instant Hedge is planted

Practical Instant Hedge growing in Iver

Instant Hedge grown & delivered in trough bags

Our instant hedges are pre-grown as a mature hedgerow, creating an immediate, impressive impact; these top quality hedging options are sold by the linear metre, rather than as individual plants.

We have specialised in producing, supplying and planting instant hedge for over 20 years to many private gardens and landscaping projects. Our mature hedges are available to plant all year round and are supplied between 0.8m and 2m high.

We supply:

- Elveden Instant Hedge™ a premium, professional product available in 2.4m lengths.
- Practical Instant Hedge™ a quality, convenient product supplied in lighter 1m lengths.
- We have other instant hedges and hedging solutions available including over 2m high.
