

Specifications:

Birds & Bees Meadowmat

■ Product Order Code	MEAD-BB
■ Available from	Harrowden Turf Ltd, Colpmans Farm, Islip, Northamptonshire, NN14 3LT
■ Standard Size	1m ² 500mm wide (19.6") 2000mm long (78.7")
Soil Thickness	18mm to 20mm (0.71" to 0.78")
Roll Weight	20kg – saturated weight may be up to 25kg
Grass height on despatch	Approx. 100mm (4"). The product is mown before despatch to minimise damage to plants. It will not be in flower when it is delivered.

All measurements are approximate and taken when harvested.

■ Growth	Harrowden Turf Birds & Bees Meadowmat is a blend of 41 native wildflowers specially selected to be pollinator friendly. Many of the species are perennial which means they will flower every year if the conditions are suitable. Grown on a biodegradable coir blanket which means no grass species are required resulting in a more colourful Meadowmat that is also suitable for green roof installations. Harrowden Turf Birds & Bees Meadowmat will contain mature plants, root fibre and enough substrate to maintain the plant during establishment.
■ Typical Seed Mixture*	100% Native Wildflowers
■ Soil Classification	Grown on a sandy loam and compost based substrate.

With no grasses, this 100% wildflower mix is ideal for use on green roofs or areas where a florally focussed display of colour is required.

GROWING BETTER TOGETHER

Features:

Birds & Bees Meadowmat

■ Features

A mixture of mature plants that allows you to establish dense planting very quickly - more reliable than seeding and less time-consuming than plug planting.

Biodiverse and pollinator-friendly providing a valuable source of nectar and food for many species of insects and birds.

Contains perennial, annual and bi-annual species to ensure a varied display each year.

Grown on a low nutrient green roof substrate to ensure the best mix of species and controlled growth.

Environmentally friendly requiring no pesticides and only minimal feeding when installed on a roof.

Low maintenance – does not require regular mowing.

Prefers a neutral pH but can tolerate acidic or alkaline soils - for best results this product requires installation on a low nutrient soil or substrate mix.

Ideal for:

Biodiverse landscaping schemes

Low maintenance areas

Commercial landscaping

Urban Areas and parks

Domestic gardens

Areas requiring maximum colour and interest

Green Roofs

- Wild pansy
- Wild thyme
- Yarrow

100% Native Flowers

**As sown. The actual percentage of each species contained may vary due to environmental factors. Harrowden Turf makes every effort to ensure wildflower products are free from weeds and pests, however due to the natural way in which these products are grown we cannot guarantee they are 100% pest free on delivery. It is unlikely that you will see every species that is listed. The variation of species present has been developed to suit a wide variety of soils and environmental conditions. This will result in a product that will adapt to individual settings which may mean some species are more successful than others. Contains annual bi-annual and perennial species. If installed after March many species may not flower during the first year.*
