<b>Grass height on despatch</b>	Approx. 100mm (4"). The product is mown before despatch to minimise damage to plants. It will not be in flower when it is delivered.

*All measurements are approximate and taken when harvested.*

■ <b>Growth</b>	Harrowden Turf Traditional Meadowmat is a blend of 3 slow-growing grasses and 31 native wildflowers typically found in an old fashioned hay meadow. Many of the species are perennial which means they will flower every year if the conditions are suitable. The specially selected grasses ensure coverage all year round. Harrowden Turf Traditional Meadowmat will contain mature plants, root fibre and enough soil to maintain the plant during establishment.
■ <b>Typical Seed Mixture*</b>	20% Slow growing grasses 80% Native Wildflowers
■ <b>Soil Classification</b>	Grown on a sandy loam and compost based substrate

**Traditional Meadowmat gives you a colourful mix of grasses and flowers to recreate the wildflower meadows of yesteryear in your garden.**

## Flowering Times

GROWING BETTER TOGETHER

# Features:

## Traditional Meadowmat

### ■ Features

A mixture of mature plants that allows you to establish dense planting very quickly - more reliable than seeding and less time consuming than plug planting.

Biodiverse and pollinator friendly providing a valuable source of nectar and food for many species of insects and birds.

A mixture of grasses and wildflowers for year-round interest.

Environmentally-friendly requiring no fertilisers or pesticides.

Low maintenance – does not require regular mowing.

Prefers a neutral pH but can tolerate acidic or alkaline soils - for best results this product requires installation on a low nutrient soil.

### Ideal for:

**Biodiverse landscaping schemes**

**Low maintenance areas**

**Commercial landscaping**

**Urban Areas and parks**

**Domestic gardens**

Free draining sandy loam  
with 40% compost

*\*As sown. The actual percentage of each species contained may vary due to environmental factors. Harrowden Turf makes every effort to ensure wildflower products are free from weeds and pests, however due to the natural way in which these products are grown we cannot guarantee they are 100% pest free on delivery. It is unlikely that you will see every species that is listed. The variation of species present has been developed to suit a wide variety of soils and environmental conditions. This will result in a product that will adapt to individual settings which may mean some species are more successful than others. Contains annual and perennial species. If installed after March many species may not flower during the first year.*
