## Enviromat Drainage Mat

- **Product Order Code** ENV-DRAINAGE MAT
- **Available from** Harrowden Turf Ltd, Colpmans Farm, Islip, Northamptonshire, NN14 3LT
- **Standard Size** 1m<sup>2</sup> - Full roll size 1m x 50m  
This product is supplied by the square metre cut to size.  
Thickness 20mm (0.79")  
Weight 0.6kg/m<sup>2</sup>  
*All measurements are approximate.*
- **Details** A thermally bonded, woven nylon loop mat with geotextile filter layers each side. Provides both protection and drainage for flat roof installation of Enviromat Sedum Mat. Due to the multi-directional nature of the nylon loops this product allows water to flow in any direction.
- **Uses** Protecting the waterproofing layer on flat roofs from damage.  
Provides filtered drainage for lightweight extensive sedum roofs.  
Can be used as a drainage layer for sedum ground installation where there is a risk of shallow water pooling.

**A multi-functional drainage and filter mat which prevents the roots of Enviromat Sedum Mat becoming waterlogged. Used mainly on flat roof installations.**

### Features

- Low density.
- UV resistant.
- Easy to cut using a utility knife.
- Does not degrade over time.

**Please Note:** This product does not provide water storage and is not suitable for intensive roof systems.
