

Harrowden Low Nutrient Topsoil

- **Product Order Code** SOIL-LOW NUTRIENT
- **Available from** Harrowden Turf Ltd, Colpmans Farm, Islip, Northamptonshire, NN14 3LT
- **Standard Size** 0.72m³ (0.94yd³)
Weight 800kg
Coverage 5m² (5.97yd²) to a depth of 145mm (5.7")
This product is sold per bag. Actual weight will depend on moisture content at the time of bagging.
- **Details** A British Standard (BS3882:2015) tested Loamy Sand Topsoil screened to 10mm, suitable for establishment of species-rich wildflower areas. This predominantly sand based soil with low levels of organic matter has a fine single grain structure, making an easy to work with friable soil ideally suited for planting, turfing and seeding. The very low organic matter content ensures a low fertility status and has no contaminants that are considered toxic to plants, human life or the environment. Slightly alkaline, this soil suits plants with a wide pH tolerance.
- **Uses** Establishment of species-rich wildflower areas.
Wildflower turfing and seeding.

- **Composition and Colour**

A specially blended low fertility soil essential for establishing a wildflower area.

Features

- Finely screened to ensure virtually no stones.
- Friable.
- Free draining.
- Low saline content.
- Low overall fertility to prevent domination by grasses and aggressive weeds.
- Odour free.
- Fine grain structure.
- pH 7.8.
