## Low Nutrient Topsoil 20L

- **Product Order Code** SOIL-LOW 20L
- **Available from** Harrowden Turf Ltd, Colpmans Farm, Islip, Northamptonshire, NN14 3LT
- **Standard Size** 20 Litres
- **Weight** 22kg
- **Coverage** 1m<sup>2</sup> (1.19yd<sup>2</sup>) to a depth of 20mm (0.79")  
*This product is sold per bag. Actual weight will depend on moisture content at the time of bagging.*

- **Details** A British Standard (BS3882:2015) tested Loamy Sand Topsoil screened to 10mm, suitable for establishment of species-rich wildflower areas. This predominantly sand based soil with low levels of organic matter has a fine single grain structure, making an easy to work with friable soil ideally suited for planting, turfing and seeding. The very low organic matter content ensures a low fertility status and has no contaminants that are considered toxic to plants, human life or the environment. Slightly acidic, this soil suits plants with a wide pH tolerance.

- **Uses** Establishment of species-rich wildflower areas.  
Wildflower turfing and seeding.

- **Composition and Colour**

**A specially blended low fertility soil essential for establishing a wildflower area.**

### Features
