- **Available from** Harrowden Turf Ltd, Colpmans Farm, Islip, Northamptonshire, NN14 3LT
- **Standard Size** Available in various quantities. Sowing Rate 10g/m².
- **Growth**

Harrowden SuDS Meadowmat Seed Mix is a blend of 4 native grasses and 30 native wildflowers that have been selected for their ability to root into and stabilise poor nutrient soils. The mix contains perennial species which means they will flower every year if the conditions are suitable. The specially selected grasses ensures all year round coverage along with strong rooting to aid soil stability. Harrowden Turf SuDS Meadowmat Seed Mix was originally developed for Sustainable Urban Drainage Systems but is also ideal for any sloped areas, providing stability, low maintenance and colour to otherwise challenging hard to reach areas.
- **Typical Seed Mixture***

50% *Native Grasses*: Sheep's Fescue, Slender Creeping Red Fescue, Crested Dogstail, Small Leaved Timothy

50% *Native Wildflowers*: Autumn Hawkbit, Betony, Birdsfoot Trefoil Bladder Campion, Catsear, Common Knapweed, Common Sorrel Common St Johns Wort, Common Toadflax, Common Vetch, Cowslip, Field Scabious, Hay Rattle, Lady's Bedstraw, Meadow Buttercup, Meadow Cranesbill, Meadowsweet, Musk Mallow, Oxeye Daisy, Red Campion, Red Clover, Ribwort Plantain, Salad Burnet, Selfheal, Tufted Vetch, Vipers Bugloss, White Campion, Wild Carrot Wild Marjoram, Yarrow
- **Uses**

Biodiverse landscaping schemes; banks and sloped areas up to 65 degrees; SuDS and Bioswale Systems; around ponds and basins; soakaway trenches; low maintenance areas; commercial landscaping urban areas and parks; domestic gardens.
- **Flowering Time**

Flowers from March to November (dependant on local weather conditions) peak flowering is from June to September.

SuDS & Slopes Meadowmat Seed Mix provides a low maintenance solution. Ideal for slopes, damp soils and the margins of ponds and streams.

Features

Biodiverse and pollinator-friendly providing a valuable source of nectar and food for many species of insects and birds.

Environmentally friendly requiring no fertilisers or pesticides.

A mixture of grass and wildflowers for year round interest.

Low maintenance – does not require regular mowing

Prefers a neutral pH but can tolerate acidic or alkaline soils - for best results this product requires installation on a low nutrient soil. We recommend sowing this mix on a reinforced environmentally friendly growing blanket.

*When grown the actual percentage of each species contained may vary due to environmental factors. Harrowden Turf makes every effort to ensure wildflower products are free from weeds seeds, however due to the natural way in which these seeds are collected we cannot guarantee they are 100% weed free on delivery. It is unlikely that you will see every species that is listed. The variation of species present has been developed to suit a wide variety of soils and environmental conditions. This will result in a wildflower area that will adapt to individual settings which may mean some species are more successful than others. Contains annual bi-annual and perennial species.

**The RHS Plants for Pollinators mark is only given to plants that support pollinating insects. Find out more at rhs.org.uk/plantsforpollinators
