

Perimeter Barriers

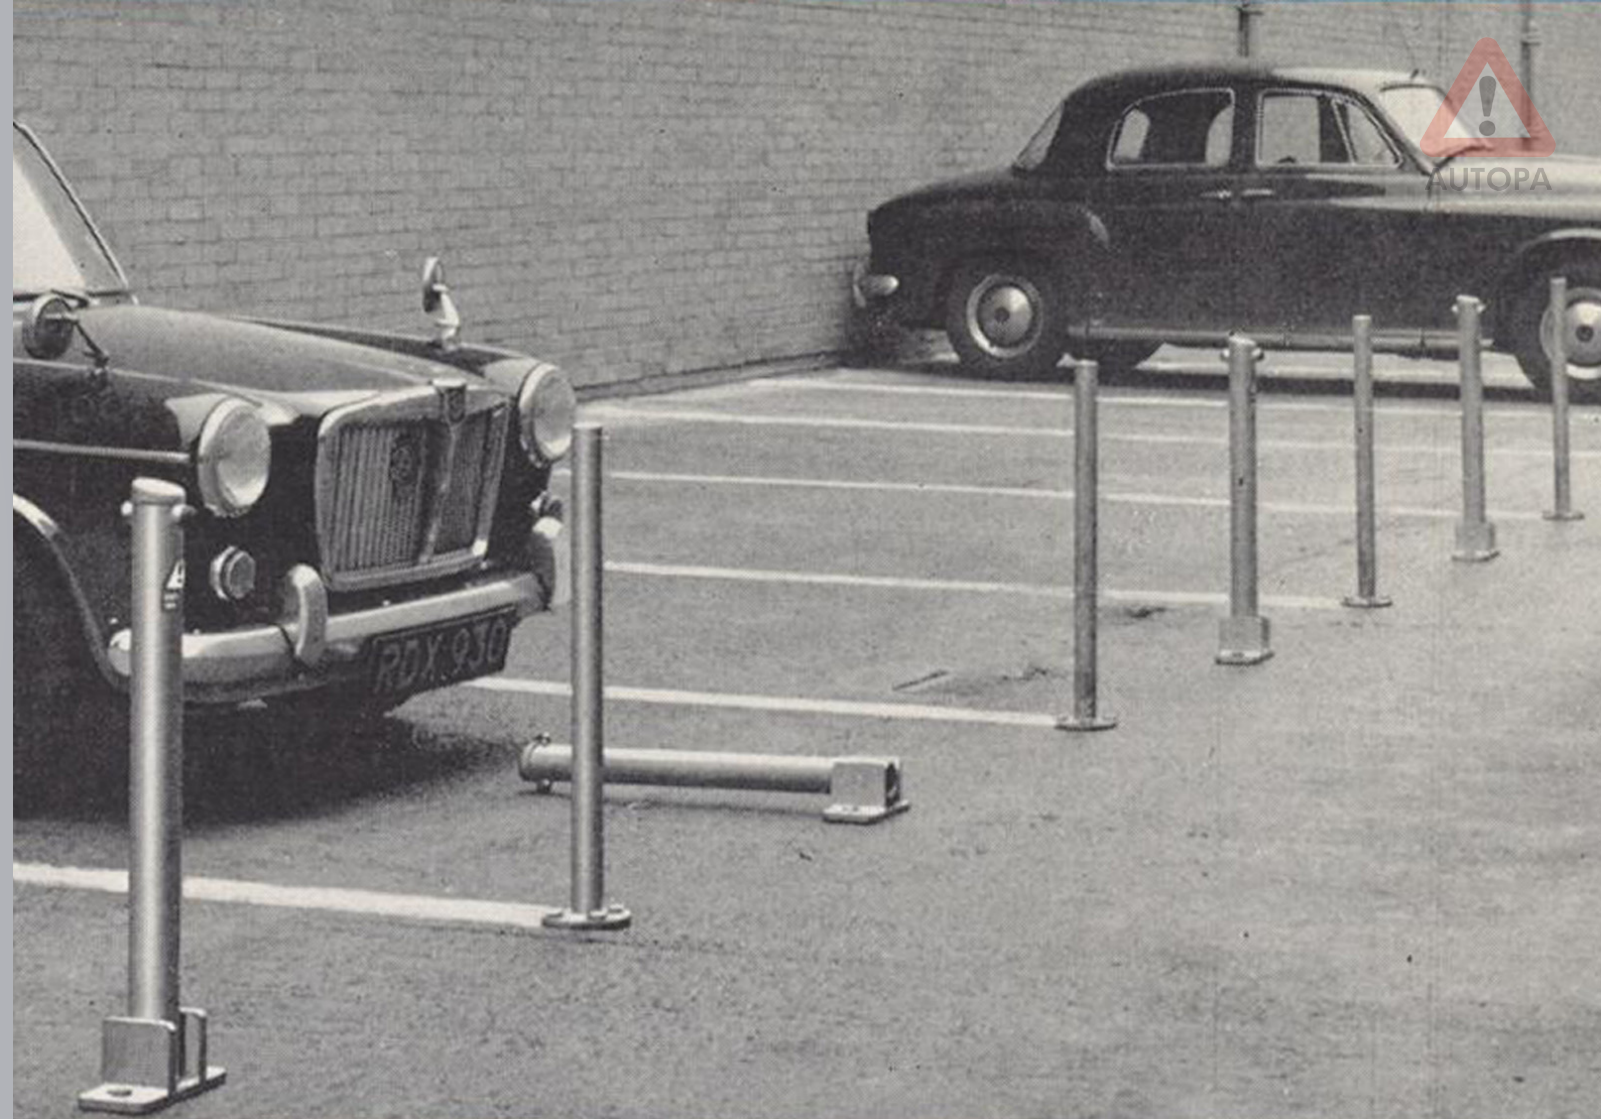

About AUTOPA Limited

AUTOPA Limited is a leading UK manufacturer of street furniture and parking control products. Since our beginnings as a manufacturer of cycle shelters, over 60 years ago, our product range has expanded to include parking posts, access control products, bollards and street furniture.

We are committed to offering the high quality of product and service that you would expect from a 9001, 14001 and 18001 accredited company, and all of our mild steel products are galvanised as standard to ensure their longevity.

Using our years of experience we can advise customers on the best products to meet their individual needs and requirements. If you can't find exactly what you are looking for please ask, we will most likely be able to help.

To view our complete product range please visit our website, www.autopa.co.uk.

Perimeter Barriers

Perimeter Barriers are designed to help secure site perimeters and provide a permanent obstacle to vehicle access. They can also be used to secure motorcycles, to mark boundaries, form trolley parks and protect vulnerable door entrances and exits. Best suited to sites where aesthetics and security are equally important, perimeter barriers are commonly found outside car showrooms. Perimeter barriers protect the cars on the forecourt without impeding a customer's view of the vehicles.

As a manufacturer we can be flexible to your requirements and manufacture a perimeter barrier to your exact requirements. Need a perimeter barrier urgently? We always retain a stock of popular sized barriers so give our sales team a call today.

Features & Benefits

- Available in sizes 500mm-2000mm wide
- Four tube diameters to choose from (48mm, 60mm, 76mm, 90mm)
- Available in stainless steel, galvanised mild steel or galvanised and coated mild steel
- Can be used to secure a large area against vehicle traffic
- Aesthetically pleasing alternative to traditional fencing
- Manufactured in the UK to your exact requirements
- Available in Ragged (for casting in), Flanged (for bolting down) or Removable (lockable with a padlock)
- Horizontal rails and central legs available on request

Product Details

Mild steel perimeter barriers are supplied with a galvanised finish as standard. Powder coating and painting is available on request. RAL colour codes must be specified at time of order.

Supplied ragged for casting into concrete as standard, removable and ragged versions available on request.

Barrier widths are measured from outside edge to outside edge.

Installation & Use

Flanged versions require bolting to established concrete of at least 300mm cubed per leg.
Ragged versions require a hole of at least 450mm deep per leg for casting into concrete.
This product is guaranteed for 12 months (if installed and used correctly).
