

The AUTOPA Blackpool Polyurethane Bollards

The AUTOPA Blackpool Polyurethane Bollard has a traditional design and offers site owners a simple and effective way of controlling parking and vehicle access. Ideal for use around shops, pavements and parking areas, these bollards can be used individually or as a part of a wider traffic calming measure.

Cast in an engineering grade, heavy duty polymer, around an integral steel core, these bollards are corrosion and shatter proof. Available ragged and black only, these bollards are a durable replacement for traditional cast iron bollards.

Options

Order Code	Description	Weight
138 124 010	Ragged	22.0kg

Product details

815mm above ground
300mm below ground
190mm overall diameter

Installation & use

Ragged bollards require a hole of at least 300mm deep for casting into concrete. AUTOPA recommends that bollards are placed no further than 1,200mm apart to ensure that no vehicle may pass between them. This product is guaranteed for 12 months (*if installed and used correctly*).
