

Cambridge Cycle Shelter

The Canterbury Cycle Shelter is an extremely robust and classically designed, free-standing cycle shelter designed for on site assembly, constructed from galvanised steel and PET sheet. The VELOPA Canterbury Cycle Shelter is a popular design that exemplifies the AUTOPA approach to cycle parking, the shelter is designed and fabricated to look good for years. The frame is made from 76mm galvanised mild steel round tube. The roof is available in either polycarbonate or corrugated steel.

Part Number	Description	Weight (kg)
138 200 650	3m Main Bay, Concrete in	355.0kg
138 200 520	3m Main Bay, Bolt down	355.0kg

138 200 522	4m Main Bay, Bolt down	395.0kg
138 200 651	3m Extension Bay, Concrete in	253.0kg
138 200 521	3m Extension Bay, Bolt down	253.0kg
138 200 660	4m Extension Bay, Concrete in	293.0kg
138 200 530	4m Extension Bay, Bolt down	293.0kg

Product details

- 2144mm x 2670mm (height x depth)
- 76mm diameter tube
- Colour Coated options available
- Extendable to any length using extension bays

Installation & use

Each end frame requires bolting to a suitable concrete surface (no less than 1,600mm x 500mm x 400mm) by means of 16 M16 bolts. Ragged versions require a excavation of a hole not less than 1,600mm x 500mm x 400mm for each end frame and new concrete poured.

On-site assembly requires construction skill.

This product is guaranteed for 12 months (if installed and used correctly).
