

The AUTOPA Plain Round Bollard (Stainless)

AUTOPA's range of Plain Round Stainless Steel Bollards is a simple and elegant way of controlling vehicle parking and access. Plain Round Stainless Steel Bollards are ideal for use around pedestrian precincts, shops, pavements, play and parking areas, as part of traffic calming measures, pedestrianisation schemes and as a deterrent to ram-raiders.

Plain Round Stainless Steel Bollards are available in Grade 304 or Grade 316 Stainless Steel.

Accessories and installation parts

138 100 991 M16 Expanding Bolt (4 required per post)

Product details

1,200mm above ground 400mm below ground (ragged only) 2mm wall thickness

Installation & use

Ragged bollards require an excavated hole of approximately 400mm³ for installation. Flanged bollards require bolting down to a suitable concrete surface (no less then 300mm³) by means of four 16mm bolts. AUTOPA recommends that bollards are placed no further than 1,200mm apart to ensure that no vehicle may pass between them. This product is guaranteed for 12 months (*if installed and used correctly*).
