

Hinged Parking Post FB Identically Keyed Galvanised, Galvanised & Colour or Stainless

The original Hinged Parking Post was patented in 1959, and is the UK's preferred choice protecting individual parking spaces. The durable and reliable design of the post guarantees that your parking space will always be available, while the reflective, high visibility band ensures your parking post will be seen in all weather conditions.

The AUTOPA Hinged Parking Post FB is lockable in the up and down positions using its integrated lock. For emergency access the AUTOPA Hinged Parking Post FB has a removable hinge pin which is secured with a Fire Brigade padlock (lock and key both available separately).

<u>Part Number</u>	<u>Description</u>	<u>Weight (kg)</u>
138 300 111	Galvanised	8.2kg

Product details

- 750mm x 203mm x 102mm (height x width x length)
- 64mm diameter tube

Installation & use

Hinged Parking Posts require bolting down to a suitable concrete surface (no less than 300mm³) by means of two M16 bolts. The area surrounding the installation must be flat and level with no nearby surface irregularities or gradient changes. Care must be taken to ensure the circular base recess is kept clear of concrete and any other debris during installation and use. This product is guaranteed for 12 months (if installed and used correctly).
