

Hinged Parking Post Identically Keyed Galvanised, Galvanised & Colour or Stainless

The original hinged parking post; patented in 1959, and still the preferred choice for the protection of individual parking spaces throughout Britain.

The extremely durable and reliable design of the parking post ensures your parking space will always be available. The reflective, high visibility band ensures your parking post will always be seen.

The AUTOPA parking post is unlocked by pressing down on the cap and rotating the key (Supplied with 2 keys). The post is then fully raised or lowered and relocked.

Available Galvanised, Galvanised and Colour Coated, or Stainless Steel (Grade 304)

<u>Part Number</u>	<u>Description</u>	<u>Weight (kg)</u>

Product details

- 110mm minimum vehicle clearance
- 64mm diameter tube

Installation & use

Hinged Parking Posts require bolting down to a suitable concrete surface (no less than 300mm³) by means of two M16 bolts. The area surrounding the installation must be flat and level with no nearby surface irregularities or gradient changes. Care must be taken to ensure the circular base recess is kept clear of concrete and any other debris during installation and use. This product is guaranteed for 12 months (if installed and used correctly).
