

Plain Square Bollard 1000mm Above Ground Stainless Steel

AUTOPA's range of Plain Square Stainless Steel Bollards offers a simple and cost effective means of establishing control over parking and access. Plain Square Stainless Steel Bollards are ideal for use around pedestrian precincts, pavements, play and parking areas, as part of traffic calming measures, pedestrianisation schemes and as a deterrent to ram-raiders.

The complete range of Plain Square Stainless Steel Bollards are available in a variety of sizes in Grade 304.

Bolt down and removable versions are also available.

<u>Part Number</u>	<u>Description</u>

Product details

- 1000mm tall above ground
- Concrete In Bollards - 400mm below ground
- Removable version available upon request
- Supplied with welded flat cap
- Bolt down version available upon request

Installation & use

Concrete in bollards require an excavated hole (no less than 400mm³) for installation. Bolt down bollards require bolting to a suitable concrete surface (no less than 400mm³) by means of M12 stainless steel bolts. AUTOPA recommends that bollards are placed no further than 1,200mm apart to ensure that no vehicle may pass between them. This product is guaranteed for 12 months (if installed and used correctly).
