

Steel and Stainless Steel Seating

M3 Straight Seats

Ollerton and Sineu Graff offer a variety of seating styles and options providing solutions for almost any individual requirement. Ollerton is renowned for style, quality and value. M3 Stainless Steel and Festival Steel Seating systems are possibly the most versatile and flexible available. The modularity of the systems enables seats and benches to be specified in a number of ways.

Sineu Graff's prestigious collection of European Street Furniture showcases steel and stainless steel seating, which facilitates the integration of designs into the most varied of settings. Steel products can be supplied in a range of RAL (high gloss) or Sable (matt textured) colours. The Sineu Graff street furniture is made of steel and stainless steel and can be found under the City and Urban ranges.

The design for the M3 and Festival seating systems is stylish and versatile. Straight and curved seats and benches can be designed to any length, any internal radii above 600mm and in any combination. M3 and Festival have been specified in circles, squares and sweeping serpentine curves to provide functional points to many designers' schemes.

Seats are produced in numerous standard designs, including straight and back to back seats, plus inward and outward facing curved seat segments and circular seats. Almost endless permutations are possible that can retain the strength, safety and vandal resistant features of the individual straight seats and benches.

Steel and Stainless Steel Seating

M3

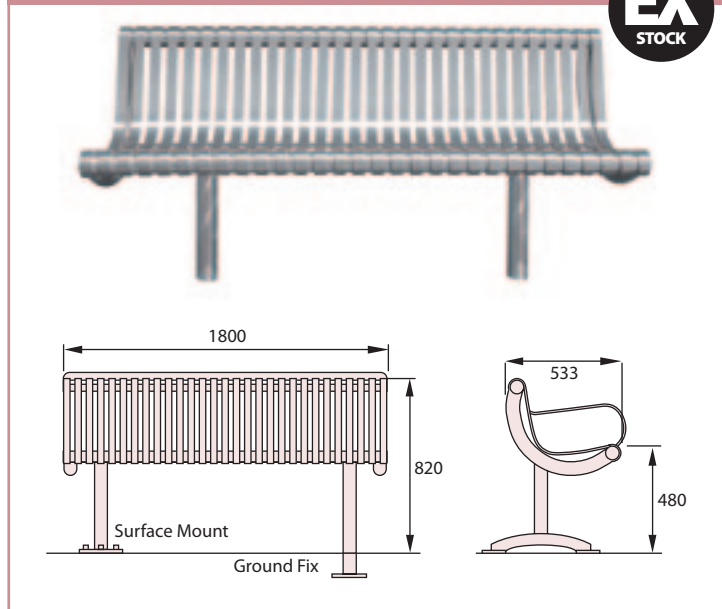

OLLERTON

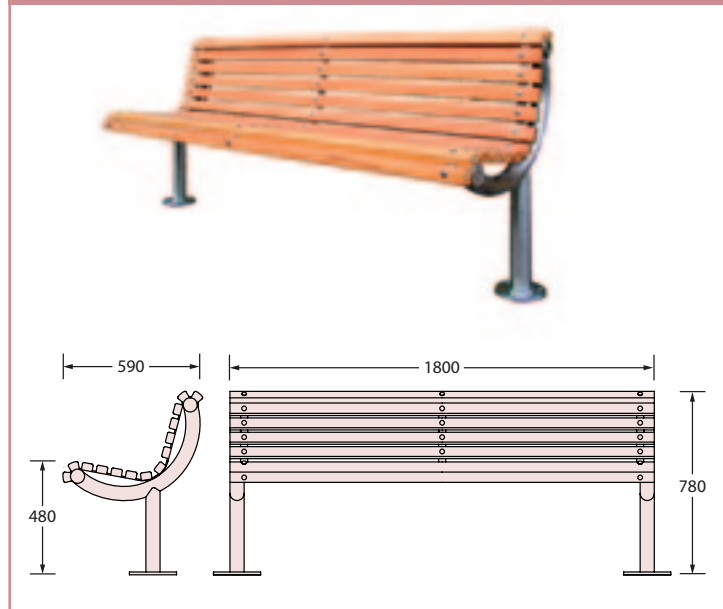

M3 Straight Seat, Selby

- Material:** Manufactured from 316L grade stainless steel. The system is less prone to pitting and staining than those in lower grades and is more durable and low maintenance.
- Seating Slats:** Standard gauge of steel in seating slat is 30mm wide x 5mm thick. This provides optimal strength so they will not bend, making the slats less prone to damage through vandalism. Each slat is wrapped around the top and lower supporting tubes and welded at three points of contact. This ensures rigidity and strength in the structure making the seat less prone to vandals trying to prise away slats.
- Legs and Frame:** Manufactured from a heavy gauge stainless steel tube 60.3mm diameter and 3mm wall thickness. Legs are continuous pieces, fully welded to the frame. This makes it extremely strong and ensures that it is difficult for it to be removed from the legs and therefore less likely to be stolen.
- Weight:** A straight seat weighs 70kg.
- End Discs:** Engraved discs are fully welded to the end of the frame tubes. This prevents ingress of dirt and water and protects the seat in the long term.
- Options:** Arm rests can be provided at any position. Freestanding legs, surface trim plates and demountable ground sockets are also available. A preventative bar is available which stops people sitting on the back of the seat backrest.
- Customisation:** Engraved motifs can be commissioned for endcaps and armrests. Plaques may also be specified.

Steel and Stainless Steel Seating

Academy

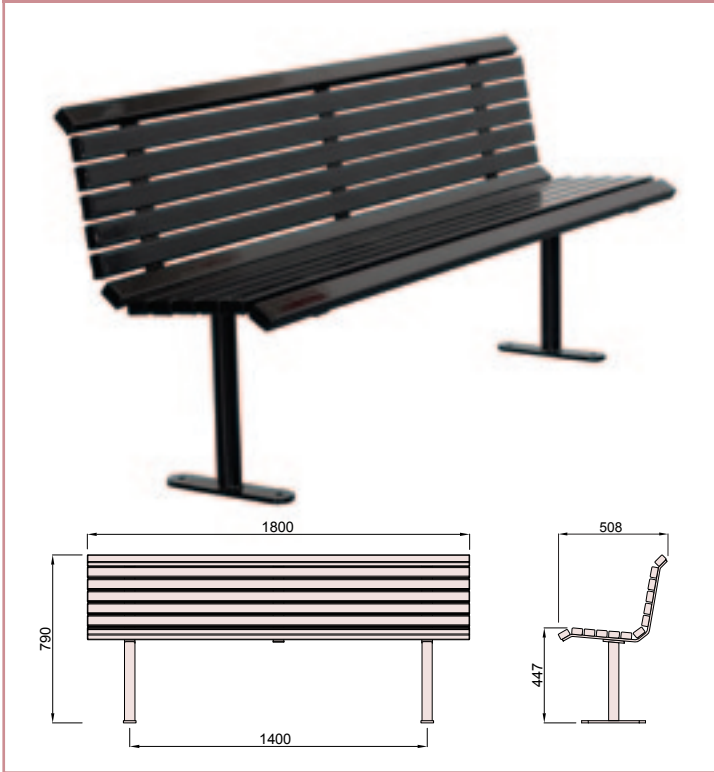

OLLERTON

Academy Steel Seat

- With its simple column supports and narrow slat seating sections, the Academy seat and bench provide a functional, durable seating solution, suitable for any environment.
- The Academy is available in mild steel, which is zinc rich primed and can be polyester powder coated in almost any RAL colour. Armrests are available as an optional extra. For additional information on the RAL colours available, please turn to page 425.
- The Academy seat and bench can also be supplied in grade 316L stainless steel for a more contemporary finish. This high grade of stainless steel makes the material less prone to the effects of pitting and staining than lower grades, providing a durable, low maintenance solution.
- Academy seats and benches are supplied with an integral base plate fixing, which can be bolted directly onto finished surfaces, or positioned below ground level.

Steel and Stainless Steel Seating

Urban

Trio Seat, Stainless Steel, Sunderland

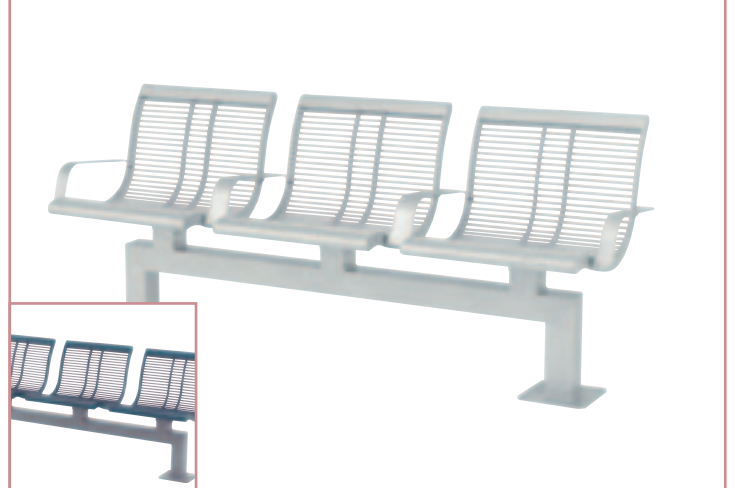

Trio Seat, Steel Green, Sunderland

- The Urban range has been designed as a full system for the enhancement of highly urbanised spaces and transport systems. It is composed exclusively of individual seats that can be used independently or as a system.
- Seating is available in either steel or stainless steel. Steel furniture is zinc-plated and powder coated to a high quality finish and is available in a range of RAL (high gloss) or Sable (matt textured) colours. For additional information on colour availability, please turn to page 425. Stainless steel furniture is made from high quality 316L grade stainless steel and is shot peened to give a smooth matt finish.
- Seats can include end and/or intermediate armrests.
- A four or five seat configuration is also available.
- Solo seating can be supplied with either a wall or wall top fixing.
- Supplied with base plate or ground fixing with a standard root depth of 390mm.
- Armrests can be supplied on request.

Steel and Stainless Steel Seating

Station

OLLERTON

STATION SEAT

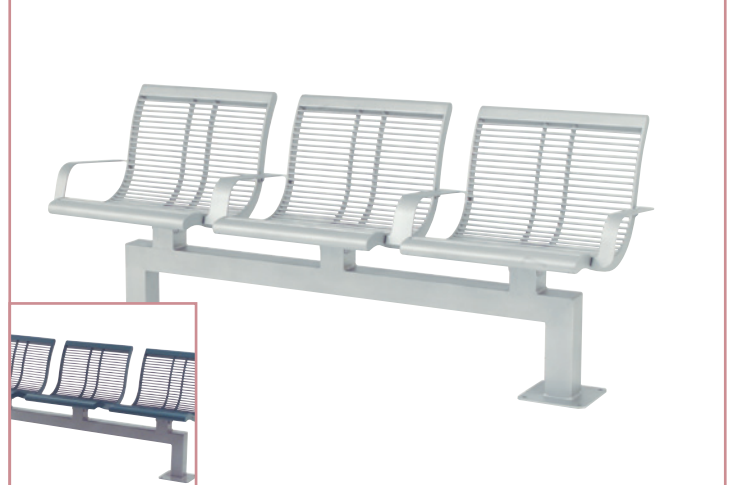

- Designed with crowded train and bus stations in mind, the Station seat is designed to ease the density and stress of travellers when commuting to work, business or leisure trips. Whatever the loads carried, the Station seat will offer comfort and tranquility to all commuters on a daily basis.
- The seat has a 2mm thick perforated sheet steel seat pan and mild steel CHS ends. It is zinc primer and polyester powder coated and root fixed. The roots are of 250mm height below ground fixed in concrete foundation.
- The seat comes in black as standard. A full range of RAL colours are available to choose from to match the surroundings, information of which can be found under page 425.
- The seat is provided fully assembled for easy site installation.
