Igneo seating is a coordinated concrete modular system that offers contemporary styling, combined with functionality and maximum robustness. It currently consists of seating, a litter bin and bollards which can act as stools. The seating can be specified to any length, based on the module sizes, dependent on the location and the number of seating places required.

Manufactured in Ferrocast®, seating arm rests and litter bin doors will have a long life span and require virtually no maintenance. Ferrocast parts can be ordered in any standard RAL colour.

With a high vandal resistance and anti-graffiti coating as standard, combined with the durability achieved from cast concrete, the Igneo series is extremely hard wearing.
