

Cast Iron and Timber Seating

Rendezvous

Rendezvous Seats, Bench and Table, Sluice Gates, Quayside, Newcastle

With its modern design and more assertive lines, the Rendezvous is a striking range of street furniture including a seat, bench, curved bench, litter bin and planter.

- Seats and benches are manufactured using hardwood from sustainable sources, treated using a unique timber treatment process.
- Timber is treated with an impregnator which protects the timber from ingress of water, algae and rot.
- After this a solvent-free, natural-coloured protective treatment is applied using an electrostatic process.
- Seat ends are constructed from cast iron which are treated against rust and polyester powder coated.
- The standard colour for seat ends is Grey 900 Sable. A full range of standard RAL (high gloss) and Sable (matt textured) colours is available. Please refer to page 427 for additional colour information.
- End and/or intermediate armrests are available on the Seat.
