The Bellitalia Giove Precious Stone Tree Planter provides a contemporary and elegant way to introduce tree planting into urban environments. The Giove planter is available in a choice of two sizes, and is manufactured from precious stone concrete with a maximum particle size of 25mm. Each planter is polished to leave a smooth finish, before being treated with a transparent anti-decay coating.

KEY BENEFITS:

- Choice of 7 precious stone colours or white granite
- Polished surface for a sleek and classic look
- Coordinates with products from the wider precious stone collection
- Available in a choice of two sizes – ø1500mm or ø1900mm
- Available with PAS integrated protective technology
- Optional extras include an anti-graffiti coating

GIOVE PLANTER

Circular planter fitted with a combined water reserve and overflow discharge system, to guarantee the soil the proper humidity level, avoiding the dispersion of internal water.

MATERIAL

The planter can be manufactured using the precious stone colour palette or from white granite conglomerate.

REINFORCING

The planter is reinforced, and fitted with lifting eyes for lifting.

FINISHING

The planter's surface can be polished, to give the product a shiny effect, or bush-hammered, for a rough appearance. The surface is then covered with a transparent anti-decay coating, or, upon request, with nanotechnology and/or anti-graffiti products. All edges are rounded or made blunt.

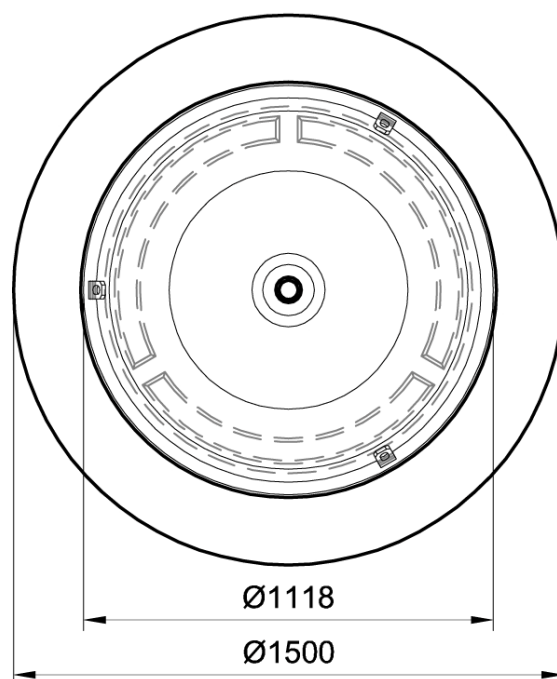

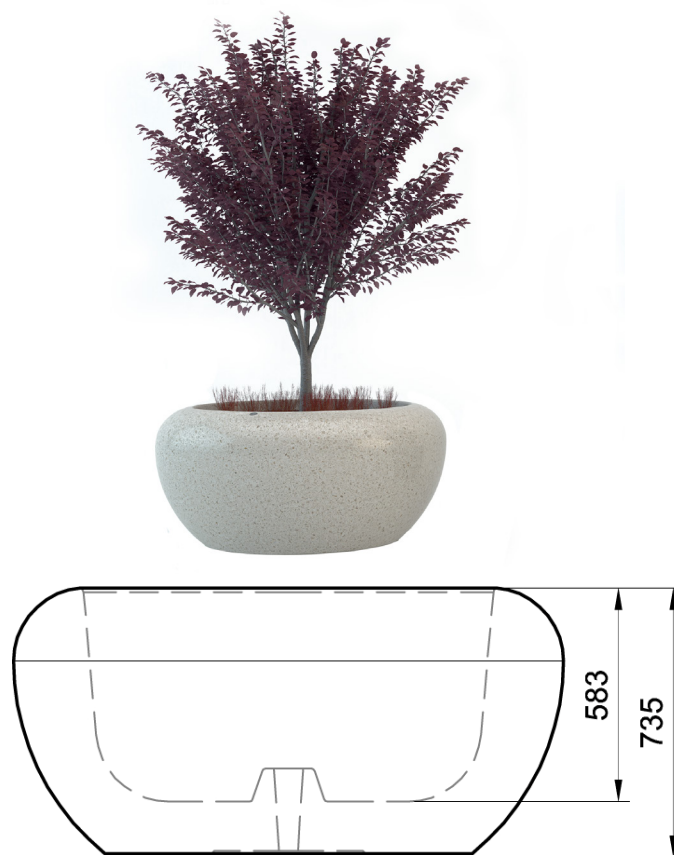

INSTALLATION

Simply place the planter on the floor and remove the eyebolts used for lifting.
