sophisticated shaping

# portiqa

The perfect bench for those who love smart shapes. Its softly curved sides are made of aluminium alloy which work together with diagonally constructed walls to create an exciting optical illusion. The bench touches the base with only a narrow edge and from some angles reveals some impossibly thin lines. The continuous lamella frame arches to below the seat so as to significantly strengthen the entire structure. Individually shaped armrests placed in the middle prevent anyone from lying down, just as the pair of armrests on either side make it easy to get up.

*The sideboard is made from machined castings from aluminium alloy; the saddle and armrest of the lamella are from solid wood. An original and solidly-fixed footing above the pavement is anchored to the ground.*
