An all-purpose range of litter bins offered in a large variety of shapes and materials. Subtle wooden lamellas, technically pure slotted steel sheet or interesting transparent stretched metal always bring a different yet elegant effect. Suitability and high resistance to vandalism and corrosion are guaranteed. The triple litter bin for sorted waste is a variation that offers a solution of the current recycling problems while conserving the unity of the design.

*Galvanized steel supporting frame with coating made of solid wooden lamellas, slotted metal sheet, perforated metal sheet, slotted stainless steel sheet or stretched steel sheet. Models with covers can be provided with stainless steel cigarette extinguisher and ashtray. Galvanized steel inner bin. Anchoring to concrete base or pavement.*
