HAND WASH STATION

Main Features

- Programmable sensor tap so run time can be adjusted
- Flow rate can be adjusted to suit a more eco friendly or user luxury station
- Water tanks on dollies for easy transport
- Water tanks are easily distinguished by colour when filling and emptying
- Self-priming diaphragm pump requires no setup, simply place the hose into the water tank and turn the power on
- Water filter provides clean water that is easily maintained with a screwable top.
- Polycarbonate screen, vandal resistant
- Designed ceiling ensures water runoff is not over the entrance and exit of the pod
- Moulded glass reinforced plastic, with anti bacterial gel coat to keep hygiene at the fore front
- Bulk refill soap dispenser large hand towel dispenser minimises station up keep.
- Bin located under the towel dispenser reduces mess and keeps the station vandal proof.
- Our sink and dispenser heights comply with wheelchair regulations.
- Angled sink allows the station to be easily cleaned but also reduces splash.
- Centralised sink for easy access to the soap and paper towels.
- Commando socket ensures safety when plugging and unplugging the station from mains.
- Back up battery with charger will keep the station running even if the mains electricity trips.
- Lighting with PIR sensor keeps the pod eco-friendly whilst lighting up the insides in low lighting conditions.
- Secure but easy access of electrics for maintenance ensures replacement of parts is quick.

THE INDOOR OPTION

The advantage of the HydroPod Hand wash station is the modularity. This offers the scope to have the product in an indoor environment. It is fully manouverable where the entire system will have wheels. Ideal for hospitals, schools, offices, high risk buildings where bathrooms are occupied quickly and large indoor events.
