Winterbourne Wall Attached Waiting / Entrance Shelter

Accentuates any doorway or main entrance

- Protect your entrances from wet weather, dust and debris
- Can be modified to include integral guttering and drainage systems
- Ideal for use outside a main or side entrance of a building to create an outside eating area
- Clear roof and open sides gives shelter a light and airy feel
- Steel construction is long lasting and hard wearing

Specifications:

Frame:

- Mild steel, hot dip galvanised to ISO 1461 2009 and polyester epoxy powder coated
- 75mm uprights and 40mm or 50mm square hollow tubes for frame
- Maintenance free for 15 years and life maintained for 25 years
- Available in 8 standard colours (see below). All RAL colours available on special order

Roof Glazing:

- 4mm polycarbonate face fixed to frame
- 16mm triple wall polycarbonate roof

Configurations and Assembly:

- Surface (bolted) or subsurface mounted depending on size and configuration
- Preparation Required (if sub surface fixing base needed):

0.5m deep hole per leg to be filled with concrete (Allow one week for concrete to cure before assembly). Hole diameter will differ depending on shelter configuration

- All fixings zinc plated
- Supplied with full assembly instructions
- Can be made to any size and configuration
- Can be installed by our installation team. Call us on **0800 1777 052** for a quotation
