# Hurst Lane Place, Solihull

**Client** Solihull Council  
**Architect** Solihull Council  
**Contractor** Balfour Beatty Living Places  
**Landscape Architect** Raquel Leonard, Wiltshire Council  
**Groundworker** Kelbec Civils Ltd

## The Challenge

Solihull Borough Council seek block paving system for Hurst Lane Place Regeneration.

When Solihull Borough Council was looking for a block paving system for the refurbishment of Hurst Lane Place, they sought a solution that would meet both the aesthetics and performance of the busy urban site. Solihull Borough Council also had a demanding schedule for the project, and required block paving that could be delivered without a lengthy lead time.

The scheme addressed a number of issues; to improve road safety, provide additional and improved on-street parking, make the area more convenient and accessible for pedestrians, and enhance the appearance of the streets.

## The Solution

Tobermore Fusion block paving system.

Tobermore presented a variety of product offerings and the council was particularly impressed with Tobermore's Fusion block paving with its striking granite aggregate surface. Fusion was specified in the sparkling tones of Silver, Mid Grey and Graphite. The products were installed in a random colour laying pattern, creating a unique, stylish and contemporary landscape.

Tobermore's ability to meet the demanding schedule of the project was a crucial factor in the council's decision making process, and Tobermore did not disappoint.

Chris noted that Tobermore's "minimal lead times for delivery" and "availability of stock at all times" surpassed the council's expectations.

**City Pave VS5**  
Plus: Q24 110 Create: 45-20-64/400

We would happily recommend Tobermore products to any architect, contractor or developer seeking a reliable hard landscaping solution with visual appeal.
