Architect Nightingales Associates
Landscape Architect Gillespies/BMJ
Contractor Brookfield Multiplex
Sub - Contractor Land Engineering

The Challenge

The NHS Greater Glasgow and Clyde district board recently faced challenges in seeking a modern, sustainable landscape for the new £842 million Queen Elizabeth University Hospital in Glasgow.

The Solution

Eager to help achieve the client's ambitions, Tobermore introduced the Hydropave permeable paving range to Gillespie's – a hard landscaping solution that promises durability, long-term structural performance and superior aesthetic appeal.

Following the provision of expert guidance and support from Tobermore's Scottish team, Gillespie's specified a combination of Tobermore's Hydropave Sienna Duo and Hydropave Fusion Permeable Paving in the sparkling shade of Silver for the landscape at the Queen Elizabeth University Hospital.

Hydropave Fusion

Plus: Q24 115 Create: 45-20-64/400
Plus: Q24 117 Create: 45-20-64/400
Plus: Q24 119 Create: 45-20-64/400

Hydropave Sienna Duo

Plus: Q24 115 Create: 45-20-64/400
Plus: Q24 117 Create: 45-20-64/400
Plus: Q24 119 Create: 45-20-64/400

The paving materials selected respond to the clients requirement for high quality finishes. They complement the new state-of-the-art building and are sufficiently robust to withstand not only high pedestrian footfalls but also overrun by service and emergency vehicle access.
