Chieftan VS5

Silver

Country Kerb

Granite Aggregate

Kingston Facing Brick

Moorland

The Innovation Factory, Belfast

Client Belfast City Council
Concept Architect/Structural Engineer McAdam Design
Contractor Heron Bros Ltd
Groundworker Castle Paving

The Challenge

Belfast City Council sought external building and landscaping products for an exciting new business hub, The Innovation Factory in Belfast.

Allan Munro, Architectural Director at McAdam Design, explained the aims of Belfast City Council in developing the 55,000 sq. ft. centre: *“The primary objective was to provide high quality, supported office space to assist the development of ‘start-up’ and innovation based companies within the Greater Belfast area.”*

The Solution

Fusion and Chieftain VS5 block paving with Country kerb and Kingston facing brick.

Allan commented on this decision to employ block paving as a hard landscaping solution: *“Block paving products were chosen to create feature elements around the primary building areas and to provide enhanced quality for the users and visitors to the building.”*

McAdam Design specified Tobermore’s modular Fusion paving system in the striking colours of Graphite, Mid Grey & Silver and large format Chieftain VS5 paving system that incorporates shift protection on five sides of each block in the colour of Silver. Country Kerb in a granite finish was chosen as the appropriate kerbing finish.
