# Primary Care Centre, Kildare Town

**Client** Chill Dara Primary Care  
**Project Director** Leading Edge  
**Main Contractor** Townlink Construction Ltd.

## The Challenge

Hard landscaping solution required for Medical & Healthcare facility in Kildare.

Townlink Construction was appointed by Chill Dara Primary Care to manage the construction of a new Primary Care Centre at the appropriately named Hospital Road in Kildare town. As part of the construction process, Townlink Construction was involved with the hard landscaping on site.

Keith Proctor, Quality, Environmental, Health at Townlink Construction Ltd, was largely involved in the project and explained the aims set out by Chill Dara Primary Care: *“The design concept for the public areas on site was to create a clean, attractive entrance way to the medical centre and functional split-level car parking.”*

## The Solution

Sienna Duo block paving.

The Tobermore ROI Sales team presented the design team with a number of block paving options and the contemporary style of Sienna Duo greatly impressed them which resulted in the product being specified prior to construction commencing.

Keith Proctor, Quality, Environmental, Health & Safety System Manager at Townlink Construction Ltd, was largely involved in the project and commented on the block paving choice: *“As well as the aesthetic benefits, Sienna Duo was perfect for incorporation on public areas, the price was competitive and we knew that Tobermore has a proven track record of excellent product quality and service so we trusted the manufacturer from day one.”*

**n55**

**Sienna Duo**  
Plus: Q24 110 Create: 45-20-64/400

All parties involved in the project were pleased with the result. It met the requirements and provided a much needed service to the local community. We would have no hesitation in recommending Tobermore products for future projects.
