Marking a New Era

TGP Landscape Architects Ltd was assigned the task of designing the landscape at Greg's Place, a vibrant outdoor community space which recently opened at the University of York, replacing the previous dilapidated Vanbrugh Piazza.

Helping TGP to mark a new era for the University, Tobermore supplied the landscape architect with modern Manhattan plank paving and Granite Step Units which were used to create a unique, striking hard landscape.

Greg's Place was named in honour of Greg Dyke, a highly respected journalist, broadcaster, and chairman of The Football Association, who was additionally Chancellor at the University for 11 years.

“For the hard landscaping, we knew that paving needed to be a versatile, cost effective, hard-wearing solution for the scheme.”

Andrew Gardener
Director at TGP Landscape Architects Ltd

The Pumphouse Barry

Mixed Use Development | Barry

Products used:

- **Tegula** - Bracken
- **Manhattan** - Silver

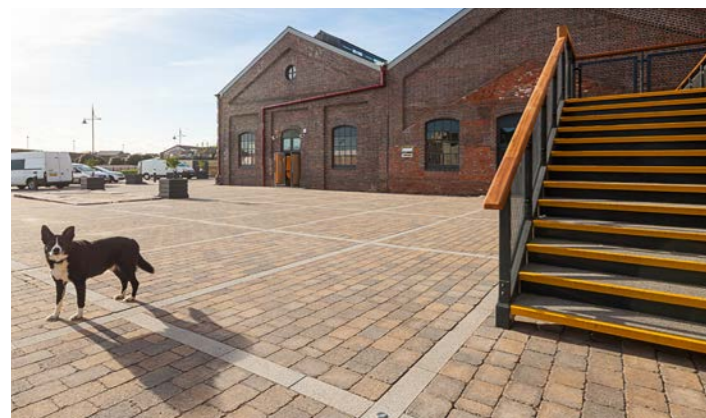

Sympathetic infusion of old and new

DS Properties undertook the task of redeveloping The Pumphouse which previously formed part of Barry's historic dock complex and provided one of the few hydraulic power buildings in Wales.

The building had gone unused for several years but had always remained a local landmark and so the decision was

made to regenerate the site for housing and commercial accommodation.

Retaining the nostalgic style was hugely important so the developer was seeking hard landscaping products that would complement the traditional surroundings. Tobermore provided the perfect solution in the form of vintage-themed product, Tegula, and striking plank paving product, Manhattan.

“We are absolutely delighted with the result and in reference to the hard landscaping works, we would most certainly recommend the products and service provided by Tobermore – it was excellent.”

Alex Knight
Development Surveyor at DS Properties

Traditional Dining with Timeless Design.

Ogilvie Construction was seeking a practical hard landscaping solution with aesthetic qualities that would complement Red Burn Farm, a new country-themed restaurant/pub in Hamilton. Tobermore presented the contractor with a variety of paving products that were both attractive and functional to meet the client's needs.

“The products and service provided by Tobermore was simply excellent. We have since utilised Tobermore products to assist us in design and build project submissions.”

Lauren Kidd
Senior Buyer Ogilvie Construction

New Retaining Wall Brochure Launch

Created with engineers, architects, housebuilders and contractors and in mind, the all-encompassing brochure details Tobermore's award-winning Secura Retaining Wall System, including extensive technical information and access to an interactive online tool to obtain technical design drawings for your project.

The brochure also includes photography of a wide range of schemes to suit all project needs. Technical excellence lies at the core of Tobermore's segmental retaining wall system. Secura is designed to prevent sloping site issues as well as creating a more efficient use of land. Additionally, Secura retaining walls are a cost-effective solution as they are mortar-free and promise a fast and easy installation process.
