Thorngrove Park, Glasgow

Client Mayor's Office for Policing and Crime
Architect Allford Hall Monaghan Morris
Structural Engineer Arup
Main Contractor BAM Construction

The Challenge

To provide paving and SUDs solution for Thorngrove Park.

Thorngrove Park, comprising of 25 beautiful homes and set within the conservation area of Bearsden in Glasgow, was developed by Westpoint Homes, one of Scotland's most highly regarded, private house builders.

Young and Gault Architects devised the specification of the properties at Thorngrove Park, which were designed with style and imagination, and carefully crafted with the finest materials.

I would absolutely recommend Tobermore products to anyone in the construction industry. I have incorporated Tobermore products into designs in the past and I will certainly do so again in the future.

Javier Ampuero
Allford Hall Monaghan Morris Architects

The Solution

Following the success of previous projects, such as Barronsfield Grange in Newton Mearns where Tobermore's Scottish team worked closely with Westpoint Homes, the builder's decision to specify Tobermore paving and walling products was very easy.

The entire hard landscape at Thorngrove Park was created with Tobermore products – from the aged, antique finishes of Tegula and Retro block paving in the soft, blended tones of Bracken and Riven Flags in subtle Charcoal, to the more modern, smooth finishes of Shannon block paving, also in Bracken.

With the increased risks of flooding in the UK in recent years, Westpoint Homes felt it was vital that a SUD's solution be employed to help prevent potential problems. Tobermore's Hydropave Tegula and Hydropave Shannon permeable paving was the key to providing an infiltration method for rainwater run-off.
