First Impressions Count

Adding Value & Visual Appeal to your homes.

Tobermore is proud to supply house builders throughout the UK and Ireland with world-class paving and walling products that add value and visual appeal to their homes. At Tobermore, we know that first impressions count. In fact, studies have shown that home buyers make their purchase decision within seconds. We are here to provide beautiful products with technical excellence at their core.

Return on Investment on Capital Employed

When it comes to building homes that sell, you need to be guaranteed that you will receive return on investment on capital employed. An important aspect of this is understanding what is important to your customer, the homeowner. A well maintained driveway, patio and garden are all significant contributing factors to enhancing kerbside appeal. Creating beautiful outdoor spaces which homeowners can enjoy with family and friends is truly priceless.

Sell your houses faster...

When it comes to selling homes fast, appearances matter. At Tobermore, we recognise that you are not just selling bricks and mortar to your customers, you are selling an aspirational lifestyle. Purchasing decisions are often made before stepping over the threshold. Beautiful paving and walling contribute to making a great first impression which can enhance the speed of sale.

Salterns Reach, Prinsted

PRODUCTS / Hydropave Tegula Duo Heather

Add value to your houses...

Not only can quality paving increase the speed at which you sell your houses, it can also increase the amount you sell your houses for. Estimations reveal that a paved driveway can increase your house value by between 5-10%. When you consider how much the paving will cost, the return on investment is significant.

Baxter Green, Bramcote, Nottingham

Sell your houses for more...

Overlooking the importance of kerb appeal can prove very costly. Research has shown that homeowner buying decisions are made using emotional as opposed to rational thinking. A pristine driveway and patio can be enough for a person to imagine summer barbeques with friends. Once they envisage the property as theirs, emotions are involved. The more people who imagine their lives in your homes, the higher market demand will be and therefore the more you can charge for your units.

Brand Reputation

In the housing market, people buy from reputable brands. They trust house builders that are known for their quality developments. Tobermore has a 75 year history steeped in quality and continuous improvement. We are proud to produce world-class paving and walling that stand the test of time. You can trust **#TeamTobermore** to protect your brand reputation.

Outdoor living has never been so desirable.

Patio areas offer so much more than a place to entertain. Whether you are hosting family barbeques, enjoying drinks with friends or spending time with kids, a patio is a versatile extension of your home.

73%

of respondents feel that green space will be become a priority for urban buyers –

The Tobermore Difference

We are proud to be a trusted supplier of leading House Builders, providing paving and walling products on the nation's most beautiful schemes.

Founded in 1942, Tobermore has evolved from a modest sand and gravel business into a world-class manufacturer of paving and walling, supplying the commercial and domestic markets throughout the UK and Ireland.

Over decades of continuous improvement and putting our customers at the centre of everything we do, we are proud of our unique selling points which truly differentiate us in the market.

✓ PrimeTop

Tobermore's products are superior to typical concrete pavers as they are manufactured with 'PrimeTop', a hard-wearing surface layer. Every block and slab undergoes a meticulous manufacturing process that improves strength, durability, UV performance and colour retention.

✓ Hydropave

HydroPave permeable paving combines the aesthetics of the Tobermore range and the environmental benefits of a permeable paving system that reduces the risk of flooding and pollution. HydroPave paving is available in the Tegula, Shannon, Sienna and Pedesta ranges.

✓ Ef-Stop

Efflorescence is a common unsightly problem with hard landscaping products. To combat this, all Tobermore products undergo an 'Ef-stop' process which involves extensive vapour curing, dramatically reducing the appearance of efflorescence.

✓ EasyClean

EasyClean flags are treated with stain resistant technology during the manufacturing process allowing for built in protection. The stain resistant technology prevents spills from penetrating the surface of the flag, allowing for them to be wiped away with ease.

✓ ServiceSure

ServiceSure is Tobermore's unique package of customer service benefits developed to ensure an efficient, consistent and streamlined experience. This unbeatable, seamless service follows your project from initial enquiry to delivery and beyond, keeping you fully informed at every stage.

✓ 25 Year Guarantee

We guarantee the structural integrity of our paving blocks, when supplied for private use for a domestic project in a lightly trafficked area, for 25 years from the date of purchase.

*During this period, we will replace any paving blocks which fail to meet this guarantee, provided that they were suitable for use in relation to the relevant project and, if installed, were installed properly.

Free House Builder Design Support

At Tobermore we provide a range of support tailored for House Builders to assist with all your landscaping requirements from project concept to completion.

We understand you may not have a great deal of time to research and select hard landscaping, so this is where we can help. Tobermore is proud to provide House builders with free design and technical support services.

We appreciate that you are short on time, and therefore our dedicated House builders Team is available for virtual meetings via Microsoft Teams. You can join webinars to explore our products and services in more detail and collaborate with plans and other relevant documents via screen share.

Media Lightbox

We can give you access to our online library of high-resolution project and product images. These images can be shared with your design team to gain inspiration and create mood boards.

Laying Patterns

Hard landscaping can be made more interesting with different laying patterns and colour mixes. Let us know what products and colours you like, and we will send you different patterns.

Product Samples

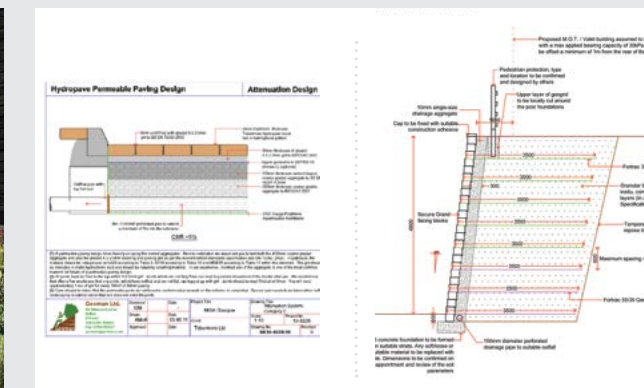

We can send product sample cuts, boards and full size samples for review by yourself and your design team. On request, we can even deliver 2m x 2m sample panels direct to your site.

Visualisations

Send us a 3D visualisation and we can overlay any product, pattern and colour mix, showing you how well your housing project will look when the hard landscaping is complete.

Permeable Paving / Retaining Wall Design

We have partnered up with a geotechnical engineering consultancy who provide complimentary structural designs which can be indemnified for construction if required.

Paving Advice

This is a detailed hard landscape proposal, packaged together in one professional document. It contains concept images, annotated drawings, laying patterns, BIM/NBS store codes, required sub-bases and specification sheets.

Artro

The concrete alternative to clay paving.

Artro linear paving range is inspired by the beauty and intimate scale of traditional European clay pavers which is perfect for modern and traditional homes.

Select from seven colours ranging from cool contemporary greys to warmer traditional tones, including a striking clay-red alternative, 'Autumn'.

The long thin pavers have the dimensions of 220mm by 55mm and a depth of 80mm which provides the option for vehicular access on roads and driveways.

Artro draws on a range of laying patterns, jointing materials and colour mixes to create distinctive housing developments with personality.

Tobermore's Artro range marries the aesthetics, colour retention and hard-wearing nature of clay pavers with the cost savings, availability and versatility of concrete pavers making it the perfect choice for house builders.

Retaining Walls

Attractive mortar-free retaining walls.

Secura is a retaining wall range which provides an effective solution for any type of housing application. Not only does Secura prevent sloping site issues and create a more efficient use of land, but the mortar-free product is cost-effective and provides a fast and easy installation process. The product is available as Secura Grand and Secura Lite, which are suitable for different sized walling projects.

SCAN HERE

Secura Lite

Antique retaining wall blocks for small walling projects.

The simplicity of the Secura Lite Gravity mortarless build technique makes it highly efficient for low walls in the housing sector.

Secura Lite is a gravity retaining wall which relies solely on the weight and setback of the segmental concrete blocks to resist pressure and retain the soil behind it.

Secura Lite can be constructed as a gravity wall to a maximum retained height of 880mm in situations where there is no crest or toe slope and no surcharge above the wall.
