

Horizontal air discharge

With plenum box

With damper blade

With light baffle

Ceiling diffusers

Type ADT

For four-way horizontal supply air discharge, with fixed air control blades aluminium diffuser face

Square ceiling diffusers

- Nominal sizes 150, 225, 300, 375, 450, 525, 600
- Volume flow rate range 25 - 681 l/s or 90 - 2450 m³/h
- Square diffuser face
- Diffuser face made of aluminium with powder-coat finish
- For supply and extract air
- For variable and constant volume flows
- For all types of ceiling systems
- High induction results in a rapid reduction of temperature differences and airflow velocities

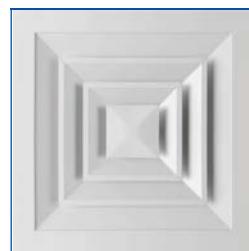

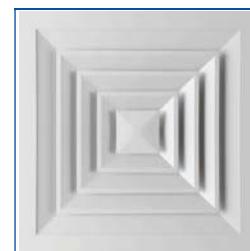

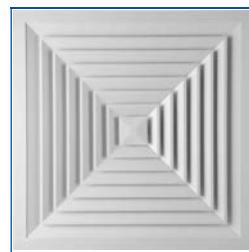

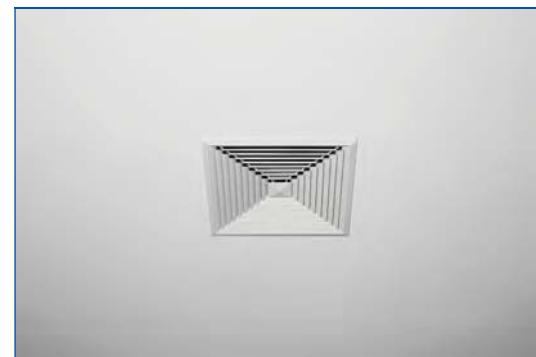

Optional equipment and accessories

- Exposed diffuser face available in RAL CLASSIC colours
- Horizontal or vertical duct connection
- Blanking plates for adjusting the discharge direction
- Plenum box with cord-operated damper blade and pressure tap

Description	Application	Parts and characteristics
	<ul style="list-style-type: none">- Type ADT ceiling diffusers are used as supply air or extract air diffusers for comfort zones- Attractive design element for building owners and architects with demanding aesthetic requirements- Horizontal 1, 2, 3 or 4 way supply air discharge for mixed flow ventilation- High induction results in a rapid reduction of temperature differences and airflow velocities (supply air variant)- For variable and constant volume flows- For supply air to room air temperature differences from -10 to +10 K- For room heights up to 4 m (lower edge of suspended ceiling)- For all types of ceiling systems	<ul style="list-style-type: none">- Square diffuser face with fixed air control blades- Diffuser front frame- Simple installation of the diffuser face due to clip fix plenum
	Variant <ul style="list-style-type: none">- Square diffuser face	Construction features <ul style="list-style-type: none">- Spigot suitable for circular ducts to EN 1506 or EN 13180
	Connection <ul style="list-style-type: none">- A: Diffuser face only- AG: Diffuser face with opposed blade volume control damper	Materials and surfaces <ul style="list-style-type: none">- Diffuser face made of extruded aluminium sections- Plenum box made of galvanised sheet steel- Attachments powder-coated RAL 9005, black- P3: Border and blades powder-coated, RAL9010:20%- P6: Powder-coated, RAL CLASSIC colour Gloss level: 25%
	Nominal sizes <ul style="list-style-type: none">- 150, 225, 300, 375, 450, 525, 600	Installation and commissioning <ul style="list-style-type: none">- Preferably for rooms with a clear height up to 4.0 m- Flush ceiling installation- Horizontal or vertical duct connection- If necessary, carry out volume flow rate balancing with damper blade
	Accessories <ul style="list-style-type: none">- Plenum box with horizontal or vertical connection.- Return air baffle	Standards and guidelines <ul style="list-style-type: none">- Sound power level of the air-regenerated noise measured according to EN ISO 5135
	Special characteristics <ul style="list-style-type: none">- Horizontal 1, 2, 3 or 4 way supply air discharge- Diffuser face made of aluminium- For all types of ceiling systems- Horizontal or vertical duct connection	Maintenance <ul style="list-style-type: none">- Maintenance-free as construction and materials are not subject to wear- Inspection and cleaning to VDI 6022

Technical data

Nominal sizes	150, 225, 300, 375, 450, 525, 600 mm
Minimum volume flow rate	25 – 375 l/s or 90 – 1350 m ³ /h
Maximum volume flow rate, with L_{WA} ≈ 40 dB(A)	49 – 556 l/s or 175 – 2000 m ³ /h
Supply air to room air temperature difference	-10 to +10 K

Function

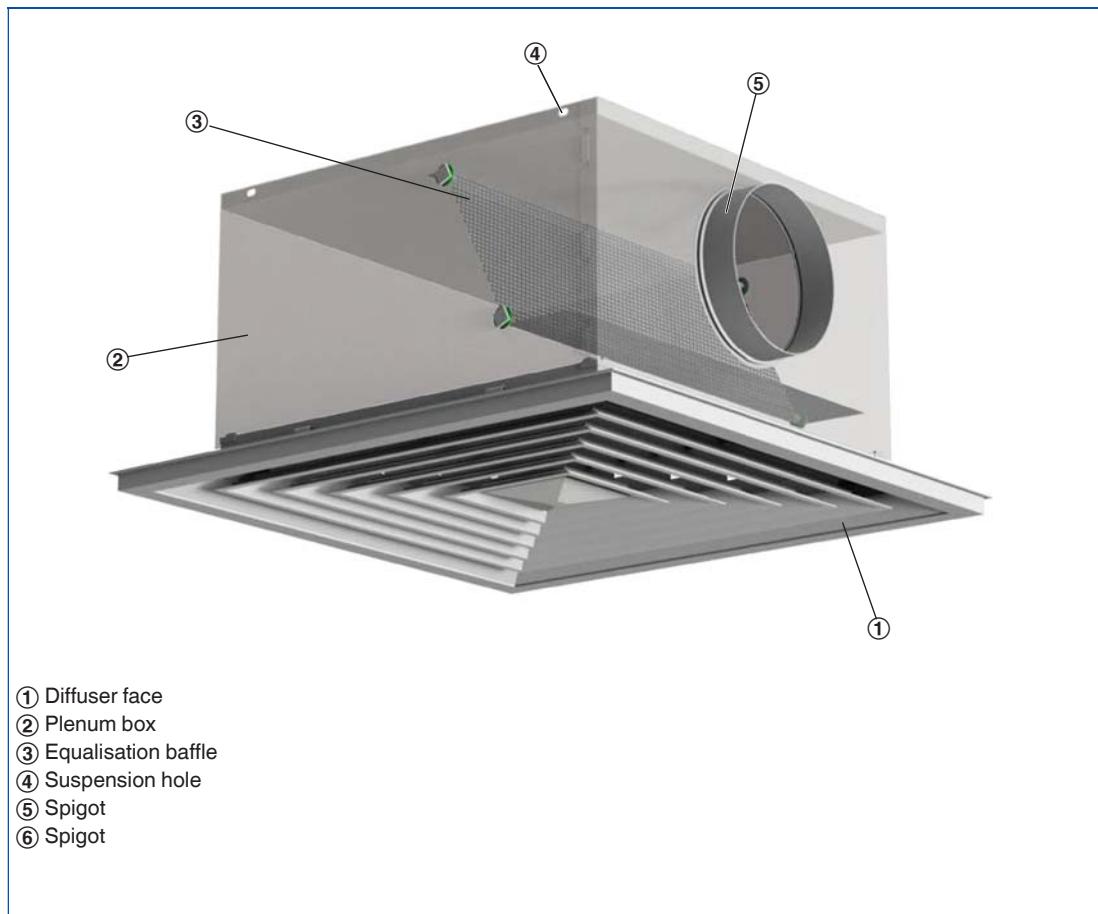

Functional description

Ceiling diffusers direct the air from air conditioning systems into the room. The resulting airflow induces high levels of room air, thereby rapidly reducing the airflow velocity and the temperature difference between supply air and room air. Ceiling diffusers allow for large volume flow rates. The result is a mixed flow ventilation in comfort zones, with good overall room ventilation, creating only very little turbulence in the occupied zone.

Type ADT ceiling diffusers have fixed blades. Horizontal air discharge is 1, 2, 3 or 4 way. The supply air to room air temperature difference may range from -10 to +10 K.

To give rooms an aesthetic, uniform look, Type ADT diffusers may also be used for extract air.

Schematic illustration of the ADT, with plenum box for horizontal duct connection

Air patterns

Horizontal air discharge

Horizontal air discharge

Principal dimensions	H₁ [mm] Distance (height) from the lower edge of the suspended ceiling to the lower edge of the diffuser face	□Q₂ [mm] Cut out dimension of a square diffuser face
	H₂ [mm] Distance (height) from the lower edge of the suspended ceiling to the upper edge of the diffuser	□Q₃ [mm] Dimensions of a square plenum box
	H₃ [mm] Distance (height) of a ceiling diffuser with plenum box, from the lower edge of the diffuser face to the upper edge of the plenum box	A [mm] Position of the spigot, defined by the distance of the spigot centre line to the lower edge of the diffuser face
	□Q [mm] Overall size of a square diffuser neck	C [mm] Length of the spigot
	□Q₁ [mm] Overall size of a square diffuser face	ØD [mm] Outside diameter of the spigot
		m [kg] Weight

Nomenclature	L_{WA} [dB(A)] A-weighted sound power level of air-regenerated noise	Δp_t [Pa] Total differential pressure
	⋮ [m³/h] and [l/s] Volume flow rate	A_{eff} [m²] Effective air discharge area
	Δt_z [K] Supply air temperature difference	All sound power levels are based on 1 pW.

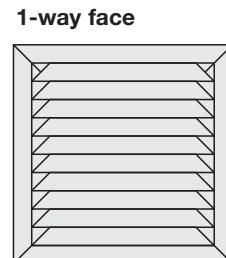

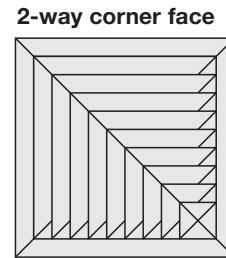

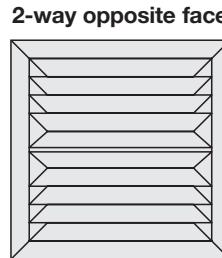

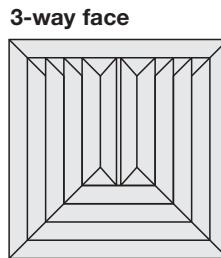

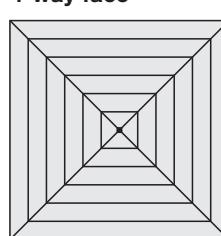

Sizing with the help of this catalogue

This catalogue provides convenient quick sizing tables for ceiling diffusers. The tables give supply air volume flow rates for all nominal sizes. The maximum volume flow rates are for an open damper blade. A smaller opening of the damper blade results in higher sound power levels and a higher total differential pressure. The tables show values for damper blade positions 45° and 90°.

Sizing data for other volume flow rates and damper blade positions can be determined quickly and precisely using the Easy Product Finder design programme.

Diffuser face configuration

Standard

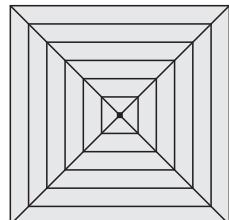

Special request

ADT*-A (face only)

Quick sizing tables provide a good overview of the volume flow rates and corresponding sound power levels and differential pressures.

Exact values for all parameters can be determined with our Easy Product Finder design programme.

Standard text

This specification text describes the general properties of the product. Texts for variants can be generated with our Easy Product Finder design programme.

Ceiling diffusers with square diffuser face. Supply air and extract air variants for comfort zones. Diffuser face with fixed air control blades for horizontal four-way air discharge. For installation into all types of suspended ceilings with various border variants. Ready-to-install component which consists of the aluminium diffuser face with fixed air control blades and aluminium diffuser front frame. Optional opposed blade damper, plenum box or return air baffle. Sound power level of the air-regenerated noise measured according to EN ISO 5135.

Special characteristics

- Horizontal four-way supply air discharge
- Diffuser face made of aluminium
- For all types of ceiling systems
- Horizontal or vertical duct connection

Materials and surfaces

- Diffuser face made of extruded aluminium sections
- AKV: Plenum box made of galvanised sheet steel
- AG: Damper made of galvanised steel, powder-coated RAL9005, black.
- P3: Diffuser face powder-coated RAL 9010:20%
- P6: Powder-coated, RAL CLASSIC colour
Gloss level: 25%

Technical data

- Nominal sizes:
150, 225, 300, 375, 450, 525, 600 mm
- Minimum volume flow rate:
25 – 375 l/s or 90 – 1350 m³/h
- Maximum volume flow rate,
with $L_{WA} \cong 40$ dB(A):
49 – 556 l/s or 175 – 2000 m³/h
- Supply air to room air temperature difference:
–10 to +10 K

Sizing data

- \dot{V} _____ [l/s]
- Δp_t _____ [Pa]
- L_{WA} Air-regenerated noise _____ [dB(A)]
