

The Coda seating range offers infinite configuration flexibility to allow specification for every public space.

The range is conceived as a kit of parts starting with 'platforms' that can be upgraded for particular tasks or environments. Thus benches are simple concrete items that can have timber elements added, also arms and backs in many combinations. The co-ordinated forms ensure visual consistency with other seating from the family.

The shapes of the seating range are subtle in form yet supremely robust and functional. The various elements are supported on minimal bases and therefore the furniture is intended to visually 'float', reducing the clutter of public spaces and remaining in the background in order to showcase human activity.

- Ø Available in three complementary concrete colours for design flexibility and to coordinate with Marshalls Metrolinia and Conservation paving.
- Ø Seating timber is Iroko, a durable untreated timber that is long lasting and delivers long term value.
- Ø The standard subtle, yet luxurious, colour for bench arms, seat backs and cycle stands is RAL 9007 'Grey Aluminium'.
- Ø The signature Coda slash colour contrast can aid DDA compliance and mask low level street dirt and rain spatter.

SILVER GREY

MID GREY

ANTHRACITE

The Coda range is specified for long life, performance and long term value in any public realm environment.

- Ø The concrete is a proprietary Marshalls specification that is highly durable with a predicted life of at least 50 years.
- Ø Factory applied ProtectGuard coating protects against graffiti, dirt and staining, limits chewing-gum adhesion, moss and lichen growth and enables easier cleaning.
- Ø Arms are BS EN1461 galvanised steel to protect against erosion for a long, maintenance free life.
- Ø Iroko timber is ethically sourced through a Chain of Custody validated by the Timber Trade Federation.
- Ø All seating elements are a root fixed leg design for secure installation.
- Ø The steel, concrete and timber furniture materials are fully recyclable.
- Ø SketchUp files and NBS data available on Woodhouse website.
- Ø The robust materials should require little maintenance however should repair be required a colour matched concrete repair kit can be supplied, timber or steel elements can be replaced and paintwork can be touched-up.
- Ø The bench arms form an element of anti-skate protection and information for armless element protection is available on request.
