

ArmaWeave

Approved for UK
Government Use,
for details contact CPNI

Features & Benefits:

- CPNI Approved for UK Government Use. For details contact CPNI
- Raking ability on up to 45 degree
- Tight woven mesh configuration offers no climbing aids
- Significant enhancement offered from attack by hand and powered tools
- Manufactured using high tensile steel
- Double high security fixing at post
- Mesh options available to meet criteria
- Ideal for use with PIDs and CCTV systems
- Available either bolt down, in ground or on wall post options.

Applications:

- Health & Emergency Services
- High Security
- Transport & Infrastructure
- Utilities

Description:

Zaun's ArmaWeave woven mesh high security fencing has been designed specifically to be installed on sites of critical national importance (CNI). The CPNI enhanced fencing system offers a more substantial delay from attack from hand and power tools than other traditional welded mesh fencing systems. Thanks to its tighter mesh pattern and use of high tensile steel wires.

ArmaWeave also offers seamless integration with detection systems including PIDs, CCTV and topping enhancements. Tested and approved for UK government use by CPNI (contact CPNI for details) and various government departments. ArmaWeave meets the current criteria for forcible attack. ArmaWeave has also been tested and approved by the MoD to use with most of the markets leading PID Systems.

The tight woven mesh pattern offers no climbing aids and provides little room for blades and cutting tools to attack the fabric. The unique properties of the ArmaWeave CPNI enhanced fencing system has the ability to be raked. Limiting the need for stepping panels on slopes and reducing installation costs significantly compared with standard welded mesh systems, while still conforming to the highest rated standards for fencing products defending against forcible attack.

Details:

Minimum height of 2 metres to maximum height of 5.2 metres

Mesh:

ArmaWeave woven mesh comprising of 17mm x 17mm mesh with 4mm vertical and horizontal wires.

Posts:

OMEGA rolled profile post to suit fence height, spaced at 2535mm centres

Post to panel fixing:

Panels fixed to posts with full height 140mm x 5mm clamp bar with twin bolt fixings at 165mm centres. The full height clamp bars create a safe finish with the mesh ends behind the clamp bar.

Gates:

Pedestrian gates are single leaf 1.2m wide, (or width to suit), framed in a 100mm x 50mm RHS with ArmaWeave mesh bolted onto the frame using the Zaun picture frame design, with slide latch. Gate supplied with rubber bump stop and 2 x suitable gate posts, either heavy duty slide bars or optionally high security locks / panic locks with integrated status monitoring.

Vehicle access gates are double leaf (single leaf vehicle gates available) 3.0m wide (or width to suit), framed in 100mm x 50mm RHS, with Zaun ArmaWeave mesh bolted onto the frame using the Zaun picture frame design, with drop bolts and slide latch. Gate supplied with rubber bump stop and 2 x suitable gate posts, either heavy duty slide bars or optionally high security locks / panic locks with integrated status monitoring.

Finish:

Materials are galvanised only or galvanised and polyester powder coated.
