

## Bowtop Play Railings

### Applications:

-  Civic & Public Sector
-  Residential & Commercial
-  Schools & Education
-  Sport & Leisure

### Drawings:

Download our drawings direct from our website:  
[www.zaun.co.uk/about-us/downloads/drawings/](http://www.zaun.co.uk/about-us/downloads/drawings/)

### Features & Benefits:

- Manufactured to RoSPA guidelines
- Slotted cleats allow panels to be installed either on flat ground or stepped as required
- Mid panel feet to support the panel to prevent sagging
- Off-set hinge eliminates finger traps
- Attractive appearance
- Strong and Vandal resistant
- Available either bolt down, in ground or on wall

### Description:

BowTop Play Railings are an attractive system that is often used around play areas. Zaun's BowTop Play follows RoSPA guidelines to make it as safe as possible.

The nature of the BowTop playground fencing system means that parents have an unhindered view of their children in the play area, and the system itself means that children can play safely. The bars and 'bows' are spaced so as to minimise the chance of wrist or neck trap occurring. Gates are also designed with safety in mind. Both the hinge and the opening side are finger trap free and an optional self-closer means the gate can shut automatically, reducing the chance of children wandering out or dogs wandering in. The vertical bars are very difficult for children to climb and so help ensure they stay in the play area. All BowTop fencing posts, panels and gates are hot-dip galvanised.

## Details:

Heights of between 0.5 metres and 1.5 metres – Bowtop Play Railings

### Railing Bars:

Vertical bars are manufactured to thicknesses between 12mm and 16mm depending upon the height of the railings with horizontal bars at the top and bottom of the panel.

### Posts:

Various square hollow section (SHS) posts sizes dependent on height (see chart below for details), spaced at 2760mm centres, available with either in-ground, bolt down or cranked installation options

### Post to panel fixing:

Bowtop railing panels are fixed to the posts using slotted cleats, cup square bolts and shear off nuts. Mid panel feet are supplied to support the panel and prevent sagging.

### Gates:

Pedestrian gates are single leaf 1.2m wide (or width to suit), framed in a 50mm x 50mm SHS with Bowtop style railing infill, supplied with a slide latch. Gate supplied with rubber bump stop and 2 x suitable gate posts.

Vehicle access gates are double leaf (single leaf vehicle gates available) 3.0m wide (or width to suit), framed in a 50mm x 50mm SHS with Bowtop style railing infill, with drop bolts and slide latch. Gate supplied with rubber bump stop and 2 x suitable gate posts.

### Finish:

Materials are galvanised and Polyester Powder coated
