

Continuous Bar

Description

Barkers' continuous bar railings are our traditional estate fencing system. This system is ideally suited to country estates, parkland, wildlife parks, paddocks farmland and large rural residences with a low to medium security risk. Continuous bar railings are particularly effective at marking boundaries and confining livestock in an aesthetically pleasing fashion.

Our continuous bar railings are manufactured from high quality, durable materials and hot-dip galvanized to enhance lifespan. We have designed with the challenges of rural environments in mind, so continuous bar railings can be easily curved to follow the contours of uneven ground.

They're available in heights of up to 1.2m, feature either round bar, flat bar and tubular bar railings. Gates can be incorporated in several environment-styles, including kissing gates and Cheshire style, and specialist deer park fencing and tree guards are available, too.

Continuous Bar Key Features

- Low to medium risk
- Designed for rural environments and galvanized for strength
- Flexible and versatile uses and additional options
- 1.2m in height
- Follows the contour of the land and ideal for uneven ground
- Complementing gates available
