

Forged Head

Description

Barkers' Forged Head railing systems are the perfect demarcation system for parks, residential areas, heritage homes, attractions and prestigious projects with a low to medium security risk. Traditional and sophisticated vertical bar railings with elegant forged heads result in a classic fence that will stand the test of time.

Our Forged Head railings are manufactured from high quality, durable materials and hot-dip galvanized to enhance lifespan. They're available in heights of up to 3m, feature either solid round, square bar or hollow infill railings and are completed with your choice of ornate tops.

Complementing gates are available and all are supplied with side hung adjustable hinges, pad-lockable drop-bolts and robust pad-lockable slide latches. Additionally, we can tailor to your requirements and apply a range of optional security extras.

This railing system is secured in concrete or base plated to surface mounting, and comes with heavy duty welded steel caps, to ensure resiliency and resistance against vandalism, cutting and vehicular access.
