

StyleGuard-VB

Description

StyleGuard-VB is a general-purpose railing system featuring traditional and sophisticated vertical bar railings. It's ideally suited to schools, play areas, commercial business centres, retail outlets, public spaces, heritage buildings and attractions with a low to medium security risk.

Vertical bar railings are built to last – both in terms of their classic aesthetic and the high quality, durable materials they're manufactured from. The StyleGuard VB is available in heights of up to 3m and is produced from square, round, square-to-view or diamond-to-view solid bars, with blunt, domed or pointed tops.

This railing system is secured in concrete or base plated to surface mounting, and comes with heavy duty welded steel caps, to ensure resiliency and resistance against vandalism, cutting and vehicular access.

The StyleGuard-VB can be tailored to your requirements and is available in a wide range of shapes and top options – including decorative forged heads.
