

Still the same successful CPD, but different....

For over 25 years Delta Membrane Systems Limited has been providing training and professional development to tens of thousands of Architects, Specifiers, Developers, Contractors and Construction professionals alike. We are recognised as the leading manufacturer of Type C structural waterproofing solutions in the country and a "go to" for solid, sound advice.

Why not take advantage of "staying in" in a positive way and keep your education moving forward during COVID19 with our live online CPD seminars. Upskill in an exciting and accessible format that you can do from home!!

Whether you want to brush up on old skills or learn new, our CPD seminars are guaranteed to offer value to your continued professional development education.

Our Waterproofing Structures Below Ground to BS8102:2009 will be going virtual on:

Thursday 30 April 2020 at 11 am

Tuesday 5 May 2020 at 11 am

Joining our face to face virtual CPD seminar is easy – just email Rachelm@deltamembranes.com with your preferred date. Rachel will respond with a link, meeting ID and Password.

On the day, simply click on the link and join the seminar.

Waterproofing Structures Below Ground to BS8102:2009

Our RIBA accredited Waterproofing Below Ground to BS8102:2009 CPD seminar considers design and build philosophies, the various challenges of waterproofing structures and how to correctly identify solutions in keeping with British Standard – BS8102:2009 Code of Practice for Protection of Below Ground Structures against Water from the Ground. Waterproofing options – all waterproofing elements which need consideration at the construction design stage to be durable and effective.

Other Seminar's available:

Flood Resilience

Our RIBA and CIWEN accredited CPD presentation provides Architects and Designers with a deeper understanding of the concepts of flood resistance, resilience and recoverability. Exploring flood resilience, resistance and recoverability and the use of technologies which have been used historically in below ground structural waterproofing in a variety of different situations from domestic to commercial structures. In addition, the CPD covers important insights for Architects/Designers when designing a robust flood resilient solution.

As always, our #TechnicalTeam are here and able to support you with:

- Waterproofing Design
- Flood Resilience, Resistance and Recoverability Design
- Ground Gas Protection Design
- Ground Gas Protection and Waterproofing Design
- Specifications
- Correct Product Selection
- Best Practice Guidance
- RIBA and CIWEM Accredited CPD Seminars
- Training and Guidance.

We are very much business as usual, our sales teams are processing orders with our warehouse staff fulfilling orders and ensuring smooth delivery.

Take care and stay well. Together, we can do this!
