

4m high exterior clock feature manufactured for new park in Azerbaijan.

Over the last 20 years we have built a reputation for manufacturing large exterior clocks so we were pleased to receive an enquiry to manufacture a very special bespoke exterior clock for a new park in Azerbaijan.

The structure was to be 4m high with a stainless steel clock supported in the middle with green LED illuminated spikes for hour markers and stainless steel LED illuminated hands.

Using the latest CAD programme and 3D design package we provided detailed drawings of the clock feature and supplied photographs of work in progress throughout the project. As the clock was to be exported and installed by others drawings for installation were also provided.

The clock feature now takes pride of place in a new landscaped park outside a brand new development, part of a massive regeneration scheme that we have been pleased to be involved with here and throughout Azerbaijan. To see other examples of our exterior clock features please visit our clock website <http://www.good-directions.com/> or to see our full range of products including clocks, cupolas, GRP features and weathervanes please visit our website <http://www.good-directions.co.uk/>.
